LACUNO ART™

Tailored cladding & moulding for Interior and Exterior Architecture

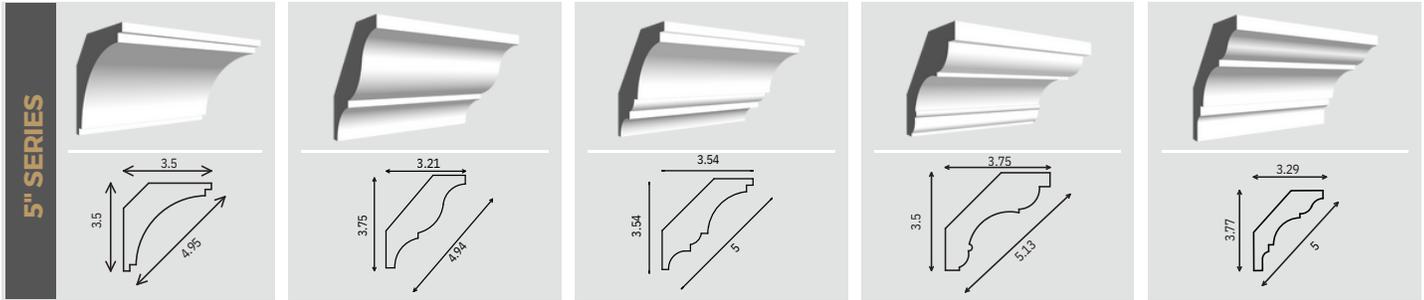

WHO WE ARE

Lacuno Art is a custom moulding manufacturer, supplier and designer of premium plaster mouldings and exterior architectural mouldings working with renovators, architects, designers and homebuilders for over two decades.

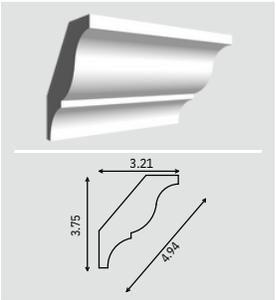

From idea generation to production, any aesthetic design can be achieved through our technologically advanced computer generated design simulation and on-site manufacturing.

The company has pioneered a process that uses specially formulated Gypsum plaster to create a strong flexible and lightweight mould and trim for both interior and exterior use. Lacuno Art offers uncompromising service.

SHIPLAPart

Shiplap is one of the most popular cladding styles for a variety of projects and comes in single panels. The profile of each board partially overlaps the adjacent board, creating attractive shadow lines.

Our shiplap moulding is extruded creating a reveal line between boards. It is made of polystyrene with a modified cement coating. Our shiplap panels are available in 2" to 16" panels by 8ft in length.

shiplap panel size 6" as shown

3D ART PANELS

Our contemporary line of 3D Art Panels work to transform any place into a luxurious space for living.

These interlocking 3D wall art panels are a lightweight, fire rated, and durable product. When installed they create a seamless and textured piece of wall art that creatively manipulates any space through a fine balance of new materials and technology.

Our 3D wall art panels help to define living spaces and influence human interaction with the ultimate goal of enhancing the visual experience for those who interact in these designed spaces.

They are made from specially formulated gypsum plaster and modified cement. When aligned together they create a seamless wall treatment. The wall panels are available in a number of dimensions, perfect for small or large scale design projects.

BOARD AND BATTEN - BOARD-BATTENart

Board and batten siding is a type of siding that consists of thin strips of wood moulding, called battens, alternated with wider boards or planks. Placing battens over boards creates an aesthetic, textured, and layered effect with chic and rustic vertical lines. Although decorative, the resulting siding can be durable and resistant to harsh weather conditions.

Our board & batten moulding has a cementitious coating with a polystyrene insulating core. All materials are fully meshed for exterior applications and offer an R8 value on our standard pieces. The moulding can come prefinished, but are typically finished on site with a coat of exterior paint. Our board & batten siding is available in 2" to 14" in width by 8 ft in length.
