**SPECIAL PROGRAM FOR TECHNICAL VOCATIONAL EDUCATION (SPTVE)
COSMETOLOGY (HAIRDRESSING) 10 Quarter 3 Week 5**

I. Topic: Perform Finishing Touches

- II. Objectives:**
1. Perform blow drying techniques;
 2. Check and apply finishing touches; and
 3. Use appropriate finishing tools;

III. Brief Introduction of the Lesson

The lesson deals with the techniques of blow drying, tips for checking accuracy and finishing touches.

Definition of Terms

Lift – to raise, to elevate

Underneath – below, under, beneath

Curl – hair that has been formed into a circle

Rinse – to clean hair with water after shampooing and other hair treatments

Tips on Blow Drying and Styling

1. When using a hair dryer, keep it on a medium or low setting. Hold it 6-8 inches away from the scalp
2. As you dry the hair with a blow dryer, use a round brush to guide the hair in the way you want it to go.
3. For a really full effect, tip the head forward and dry the underneath hair first, then straight up and dry the outer part.
4. When using curling iron or hot rollers, make sure they're heated before use. The hair will curl faster. ☑
5. For blunt styles, roll the brush under as you dry the hair for a smooth look. ☑
6. If you want the hair to flip up at the ends, use the brush to roll the hair with an upward and outward motion.

Tip the head forward and blow dry the underneath layers of hair to add fullness to the hair.

The round brush and the blow dryer are used to roll hair for a loose feathery look.

A round brush and blow dryer can be used to roll the hair under and toward the face for a smooth, loose curl.

Finishing Tools

- Blow dryer – an electrical device used for styling
- Vent brush – wider, slightly curved brushes used to lift hair to create volume or fullness to the hair
- Round brush – most popular styling tool in salons, the round brush flips hair up and turns it under while blow drying
- Curling iron – used to create variety curly styles
- Pick – a curl with long teeth is useful for lifting the hair without disturbing the curls
- Diffuser – attached to the end of any blow dryer which acts to spread out air flow, minimizing damage from direct heat
- Thermal styling tools – styling brushes, straightening irons, and crimping irons which create specific textures like tight curl or perfectly straight hair

Remember:

- Hair should be blow dried for cross checking.
- Keep the blow dryer moving at all times and never hold it closer than 8 – 10 inches from the head.
- Never brush the hair when it is wet.

IV. Activities:

Activity 1:

Direction: Analyse the pictures and identify what is being describe based on our lesson. Write your answer on the allotted space below the pictures.
