Computer Systems Servicing 10 Sharing Folder Quarter 2: Week 4 Module

Michael T. Dela Cruz Writer Gregorio S. Quineri Validator

Dr. Valentina A. Ballesteros Quality Assurance Team Chair

At the end of the module, you should be able to:

- 1. check normal server functions in accordance with manufacturer's instructions;
- 2. install and update required modules/add-ons on NOS installation procedures; and

Directions: Read the following statement carefully. Encircle the letter of the correct

3. confirm network services based on user/system requirements.

	answer.				
1.	Permissions is also known as				
	A. access rights	C. username			
	B. read	D. write			
2.	A type of access level that the users	can edit, rename and move files is			
	called				
	A. access rights	C. read			
	B. execute	D. write			
3.	The user can run a specific program	is one chracteristics of the user level			
	access called				
	A. access rights	C. read			
	B. execute	D. write			
4.	What local disk can you share to the	e network if you are the network			
	administrator?				
	A. local disk A	C. local disk C			
	B. local disk B	D. local disk D			
5.	This is the filename you can use to rename the shared folder from the				
	network?				
	A. accomodation	C. redirection			
	B. direction	D. validation			
6.	What will you right click in order to	change the properties?			
	A. feeder	C. file role			
	B. folder	D. file only

BRIEF INTRODUCTION

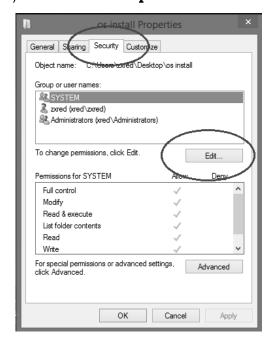

Most file systems have methods to assign **permissions or access rights** to specific users and groups of users. These permissions control the ability of the users to view, change, navigate, and execute the contents of the file system.

Type of Access levels (User Level)

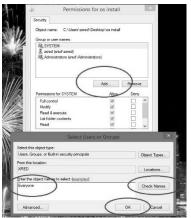

- **Read** Users with this level of permission can view files and copy them, but they cannot make changes to the file or create new files.
- **Write** Users with this level of permission can edit, rename, and move files. In most cases, they can also create new files.
- **Execute** Users with this level of permission can run a specific program or type of program file. Many businesses use this to restrict access to company programs or limit their employees' ability to run potentially dangerous executable files on company machines.

How to Share Folder in Windows Server 2008 R2

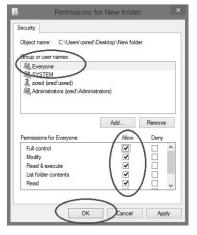

- 1. Click Start then choose Computer
- 2. Double click **Drive D:** to open
- 3. Inside Drive D:, Right click then choose **New** then click **Folder** (New Folder)
- 4. Rename the folder as **redirection** (folder)
- 5. Right click the **redirection** (folder) then choose **Properties**
- 6. Click Security Tab
- 7. Click **Edit** Button

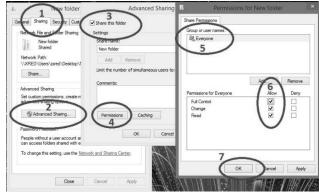

- 8. Click Add button
- 9. Type **Everyone** then click **Check Names** button
- 10. Click **OK** button

- 11. Select **Everyone** in the group then Check **Full Control**
- 12. Click Apply and OK
- 13. Click **OK** button

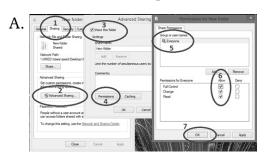

- 14.Right-click **redirection** (folder) then choose **Properties**
- 15. Click Sharing tab
- 16. Click Advanced Sharing
- 17. Check Share this folder
- 18. Click **Permissions**
- 19. Check Full Control and Change
- 20. Click **Apply** and **OK**
- 21. Click **Close** button

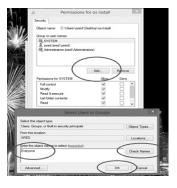

Directions: Label each picture with corresponding step sharing file).

В.

C.

D.

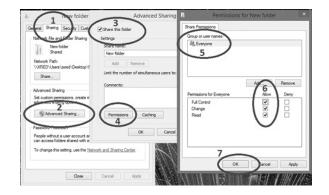

Directions: Explain and write your answer on the spaces provide for.

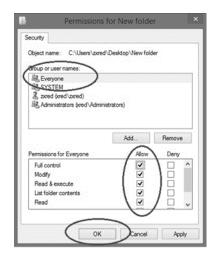

1.	What are the differences between read, write and execute?
2.	List and summarize the steps in sharing folder

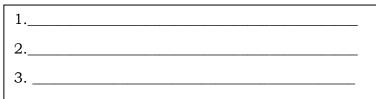

Directions: Write the steps that is shown in the picture. Use the number and encircled step for reference

5
6
7

POST TEST

Directions: Read the following statement carefully. Encircle the letter of the correct answer.

- 1. What will be the previous step before the diagram appears?
 - A. check names > click ok
 - B. check names > click yes
 - C. check name > click yes
 - D. check name> click ok
- 2. What step best decribes encircled number 6 on the picture?
 - A. click assigned tab
 - B. click permission tab
 - C. click full control
 - D. click full control and apply

B. 2

C. 3

D. 4

4.	What will you do in order to activate the A. right click local disk d and then click B. right click folder and then choose p.
