Grant Acquisition and Management Fee Structure

Consulting Perks, LLC generally uses a pay-by-hour pricing model.

Hourly Rate

\$103 - \$135 Per Hour

Before beginning a project, a maximum project allotment is negotiated for each grant. This allows an agency to determine the maximum cost they can expect, while ensuring that Consulting Perks can deliver cost savings if the grant is completed under that amount. Only the hours spent on grant writing will be billed to the agency.

Hours Per Grant

The total number of hours per grant involves a discussion with the agency to determine the project's scope and complexity. We want to remind agencies that federal grants are generally much more detailed, followed by state grants, and, finally, local grants. Elements to consider include:

- Support Identifying Potential Funders
- Writing Letters of Intent
- Assistance Preparing Budget
- Required Research for a Detailed Narrative and Project Scope
- Including Supporting Documentation [i.e., environmental studies, letters of support]
- Length of the Proposal [i.e, federal, state, or local]
- Grant Management Support [i.e., required reporting and/or budgeting after award]
- Project Management [i.e., working with vendors to define and meet timelines]
- Communication [i.e. ,community updates, board updates, social media]
- Other Agency Specific Needs

If your agency prefers a flat-fee or retainer-fee schedule, please reach out for more information. Our goal is to make your dreams your reality.
