- Implement UI components from design mock-ups
- Build and consume RESTful APIs
- Design and manage relational/non-relational databases
- Implement authentication & authorization systems
- Debug, test, and optimize application performance
- Write clean, maintainable, and scalable code
- Collaborate with design, QA, and product teams Required

### Technical Skills

- HTML5, CSS3, JavaScript
- Understanding of React / Angular / Vue (any one preferred)
- Responsive design fundamentals
- Node.js / PHP / Python / Java
- Understanding of REST APIs
- CRUD operations concept
- MySQL / PostgreSQL / MongoDB knowledge
- OOPS concepts
- Basic understanding of Git
- Awareness of 3-tier architecture
- Understanding of input validation
- Basic idea of password hashing
- Awareness of SQL Injection
- Session management fundamentals

### Eligibility Criteria

- BCA / BSc (CS/IT) / BE / BTech / MCA
- Strong foundation in programming fundamentals
- Academic project in web development preferred
