

TATTOO AFTERCARE

IMMEDIATELY AFTER YOUR TATTOO APPOINTMENT

- Keep your new tattoo wrapped for 1-2 hours
- Remove wrap and gently wash with antibacterial hand soap, I recommend Dial brand. Use the palm of your hand with light to medium pressure, do not use a wash rag or loofa. Do not scrub the tattoo.
- Repeat at this process at bedtime

THE FIRST 4 DAYS AFTER YOUR APPOINTMENT

- Wash tattoo using the same process described above.
- Allow tattoo to air dry for 3-5 minutes, or gently pat it dry with a clean paper towel
- With clean hands, apply a small dab of Aquaphor and rub into the tattoo, like lotion. Do not use in excess. The tattoo should be soft and velvety, not gooey and sticky.
- Repeat this process three times a day, each day.

THE FOLLOWING 2-3 WEEKS

- Continue washing the tattoo, three times a day, as described above. Discontinue using Aquaphor.
- Your tattoo will start to dry and peel. Apply non scented hand lotion as needed.
- If any scabs form, DO NOT PICK THEM
- The tattoo may itch. Do not scratch. Lightly pat the tattoo for relief.
- Continue this process until the tattoo is fully healed and the skin is no longer dry or scaly.
