JOBPAC DELIVERY DOCKET ENTRY

FAST DEPLOYMENT IMMEDIATE VALUE

Jobpac Delivery Dockets ensure that your project costs are being recognised as soon as they occur. The flow on effect is impressive; from margin recognition in the Business Forecasting Module, to cost accruals in the General Ledger and your business' Profit and Loss. Of course, the approval of invoices is made so much easier (even completely automated using Jobpac's 3-way matching process!) and more accurate when matching the invoice directly to a delivery. So, no more late, crumpled up or lost dirty carbon copies! Your users can enter delivery information directly against a Jobpac Purchase Order on their phones the minute the delivery happens. It's all real time and costed directly in Jobpac as soon as the user presses Submit. Edge will also store a photo/image of the actual delivery docket for retrieval as required.

FEATURES/BENEFITS

- Real time integration allows the user to easily retrieve the Jobpac Purchase Order items for easy matching (including using Jobpac's automated 3-way matching solution)
- Updates Jobpac's Cost of Work In Progress in real time
- Ensures delivery information is in Jobpac and available to the user approving the invoice associated with the order and delivery
- Records a copy of the image of the Delivery Docket inside the App for retrieval as required
- Provides access via all smart phones (or even via a Web Browser on a laptop/PC)
- Helps ensure your project teams are responsible for costs attributed to the jobs
- Fosters the adoption of technology in your construction company
