JOBPAC TIMESHEETS

FAST DEPLOYMENT IMMEDIATE VALUE

When we spoke to our customers, there were a range of issues connected to the timesheet process that they were concerned about. But when we delved further, it became obvious that eighty per cent of the problem was simply getting the data from the employees on site and into Jobpac. In some cases, the collection and data entry was taking up to two whole days.

So Edge's mobility solution aims to simply and quickly, completely solve that issue, by posting directly from any mobile device directly into Jobpac's timesheeting systems.

FEATURES/BENEFITS

- Allows for input of hours or allowances against jobs and cost centres with real-time integration
- Updates the Jobpac payroll timesheet system directly at the click of a button OR
- Updates the Jobpac ETS By Job timesheet system to provide for project level review/approval and basic award interpretation within Jobpac
- Provides access via all smart phones (or even via a Web Browser on a laptop/PC)
- Helps ensure your project teams are responsible for labour costs attributed to the jobs
- Fosters the adoption of technology in your construction company

SIMPLE TO USE

Project	RV0001: Aurora Centre
Cost Ce...	01.0002 LS: Quality Assura...
