"A Small purchase can make lot of difference "

Bamboo Research & Training Centre (BRTC) , is one of the premier Institutes for bamboo, setup by Govt. of Maharashtra on 4th December 2014. The BRTC is established to revive bamboo sector by introducing cost effective methods of production of bamboo and bamboo based products to artisans and farmers. Initially, Training on bamboo based products was started with the local tribal artisans and students. It was a good start perhaps and so, BRTC thought of extending the training to the local tribal ladies to increase the livelihood opportunity.

Understanding the fact that not only the training will be sufficient, but also daily income based on bamboo is very much needed for sustainable livelihood, BRTC planned for 6 Common Facility Centers with the state of art facilities to local villagers/artisans. These centers are being utilized by the local people to produce the bamboo based handicrafts and furniture etc.

Bamboo products are fusion of tribal and modern art with improved technologies thereby showing unique design which have utility as well as artistic value. Local ladies are tied up through SHGs.

Further, BRTC learnt that the training and facilities are not sufficient to make them self sustained, but the assured market is also necessary. Considering this, BRTC is taking the responsibility of marketing as well. One such try is this catalogue to bring the various ranges of products to you..

Why shall you buy?

You are contributing to nature conservation by replacing the plastics, with eco friendly bamboo products. People who were dependent on forest for their livelihood needs are becoming the protectors of forests by avoiding unsustainable harvest of NTFP, protecting Bamboo etc.

Increased bamboo based livelihood industries is reducing the dependency on forests which will result in reduction of Human-Tiger conflict in the land of Tigers. In that way every purchase that you make will contribute a little in Tiger conservation as well.

A small purchase of yours can make a lot of difference...stay green, go greener and gift green to our future generations.... It's time...
