- All fund movements securely require 2 threshold approvals. 1 of which is the Biometric phantom wallet address.

9. Anti Impersonation Warning

Only links published in official channels (above) are valid. Any contracts, presales, airdrops, or listings not linked by the official channels are not endorsed and may be scams. We will never DM you. During the creation of the SPUNCAT token Heather created 2 billion tokens held in the Squads Multisig wallet that can not be updated with metadata. The unusable tokens will be burned and have a completely

different token address. This is being transparent, for we intend to build trust.

10. Timeline

- Presale Start: 2025-09-28 11:11pm EST Sarasota, Florida USA
- Presale End: Exact date and time to be determined by supply sold during presale. Presale will end when 20% of total supply or 400,000,000 SPUN is sold.
- Liquidity Add + LP Lock: immediately after presale
- Airdrop Distribution: After LP lock proof is posted.

11. Vesting strategy and schedule

- Following the official launch, there will be a 6 month cliff where no presale tokens will be released for selling.
- 25% of presale tokens will be released at the six month mark for investors to trade.
- At this time a determined percentage of tokens will then be slowly released in bi-weekly increments until each wallet receives the amount of tokens which were purchased during the presale timeframe.
- All tokens will be fully vested by 14 months from launch

12. Additional Project Information

As of today's date we're in the process of updating our metadata on Solscan. Just to make sure everything is transparent and ready for our community. We are really excited because Spuncat is just the beginning—we've got big dreams for future tokens that can help raise awareness for mental health and psilocybin mushrooms. We want to get people out from behind our phone screens and back to interpersonal real human connection by including fun activities down the line.

We have kept things a bit under wraps on social media to keep the project safe from copycats. And yeah, we intend to make this meme coin to be part of the 1% of tokens that stick and stay which is why we have taken so long to introduce our idea to the public. We have been extremely careful about testing. There has been some trial and error along the way and it has been a real learning process. We want to get it right and then build a strong, welcoming community and cause a movement.

Now the cat is out of the bag! It is time to start spreading the word. It is meme thirty somewhere around the world. Sign up for presale or simply get on the whitelist for airdrops. In the meantime, we're making sure we have measures like anti-bot protections and some initial limits to keep things fair. We are also planning to grow our little team after the launch of SPUNCAT because, let's face it, doing all this as a couple is a bit of a juggling act. Honestly, we are blown away with how many different walks of people that are not only excited, but ready to back our project!

13. Risk Notice

Crypto assets are highly risky. Never spend what you cannot afford to lose. While SPUNCAT aims to be fun and fair, prices can change fast. Market conditions, exchange listings, and third party services are outside the team's control.
