

You Can't Tell the Players without a Scorecard

Although this Score Card is tilted toward experiences and history found in Arizona, it is comparable in all fifty states.

Arizona Attorney General

The Arizona Attorney General is the chief legal officer of the State of Arizona. Their job is to represent and provide legal advice to departments. (Child Protective Services) It is not their job to achieve justice for children, Mothers, or families. They defend the state systems with a ferociousness and unethical actions that border on criminal behavior. One Assistant Attorney General took a minor child for lunch alone and hours later the child was admitted to a psychiatric unit for suicidal ideations.

Child Protective Services

Child Protective Services is a state agency entrusted to investigate sexual, physical, emotional abuse and neglect of children. They are supposed to keep children safe. Consistently children that should not be taken are taken and children that should be taken are not taken. Literally thousands of cases are not investigated and children die while CPS is involved. Children are not safe in the State of Arizona's custody. It would not be unreasonable for a person to believe that Arizona Child Protective Services is used to hide medical malpractice and take children for medical experimentation if they knew some of the facts.

CPS Supervisor

The CPS Supervisor is entrusted to manage CPS Case Managers in their daily activities and caseloads. They are experienced as a CPS Case Manager. They have years of experience and were promoted because of their knowledge and understanding of the appropriate use of the agency's policies and procedures. They teach and support the CPS Case Managers and staff the cases frequently together so both have a strong comprehension of what they are doing in collaborating on the cases. Both work intimately with the Attorney General's Office.

CPS Case Manager

The CPS Case Manager is the point person on all activities regarding the child entrusted to them. They document the facts and make life altering decisions of children and families. They coordinate all activities and they follow the orders of the Arizona Attorney General's Office and their CPS Supervisor. They usually do not do things contrary to the policy and procedures of the agency without being ordered to do so.

CPS Investigator

The CPS Investigator is responsible for the initial contact with the child and gathers evidence of the Who, What, When, and Where of the suspected child abuse and neglect. They are responsible to make the decision to remove the child. When it is questionable the State of Arizona philosophy of Arizona's last two Governor's is, ***“take the child now and we will let the courts sort it all out later”***. Some of these CPS cases drag on for more than six years and are often never decided as the child turns 18 and some are decided at 11:59pm the day before the child's 18th birthday.

CPS Contracted Therapist

The CPS Therapist is a contracted person entrusted to provide mental health care for children. They are to be unbiased and follow their code of ethics and the community standards of care. CPS contracted Therapists know that if they waiver from the unwritten case plan they will slowly starve away for lack of cases.

CPS Contracted Psychologist

The CPS Psychologist is a contracted person entrusted to complete evaluations, assist with visitations, and should be unbiased and follow their code of ethics and the community standards of care. CPS contracted Psychologists know that if they waiver from the unwritten case plan that they will slowly starve away for lack of cases. This identified and supported contracted psychologist works intimately with the out-of-state psychologist, the CPS Case Manager, the CPS contracted Therapist, and actually hires discharged CPS Case Managers on cases they worked together.

Out-of-State Psychologist Contracted by multiple entities on the same case. (Unethical)

The Out-of-State Psychologist is a contracted person entrusted to provide a single element of service to a CPS case and child situation. It is unethical to serve in more than one capacity on the same case. This is not true in Arizona. The Out-of-State Psychologist wears as many as nine hats on CPS cases. The Out-of-State Psychologist: 1) Works as a consultant for the Arizona Department of Economic Security and Child Protective Services. 2) Works as a Consultant for the Arizona Attorney General's Office. 3) Consults with the Physicians and/or Hospitals that made the CPS report about the Mother. 4) Testifies as an Expert Witness for the state against the Mother. 5) Completes the Psychological Evaluation of the Mother. Coordinates the use of the Mother's Psychological Evaluation with the CPS contracted Therapists, the CPS Case Managers, and other parties involved. 6) Completes the Psychological Evaluation of the child or children. 7) Serves as the leader of the Treatment Team: a) Directs what types of treatment are to be used. b) Recommends specific books that will provide the child or children with an alternative reality of what may have happened to them. c) Opines about possibilities and not direct evidence. d) Admits not having all the medical records but enough to make a suggested scenarios. e) Advises the therapists and CPS Case Managers on what to do to get what they need for court and to support the possibility that something happened to the child in the care of the Mother. f) As a Psychologist without a Physician's License reviews medical records of admittedly insufficient scope and identifies medical procedures and medicines that should have not been provided by the physicians and/or the Hospitals and opines that it is the Mother's fault. Even identifying the Mother as the individual causing a "Do Not Resuscitate" order that only a physician can order and would never order unless it was medically necessary and appropriate. 8) Trains providers in the Arizona children's mental health provider networks on identifying Munchausen Syndrome By Proxy, Factitious Disorder, and other Psychiatric disorders. 9) Consultant to non-profits dealing with child abuse victims. 10) Consults and collaborates with witnesses from court proceedings. Note: All or some of these activities are done simultaneously on the same case of a single child.

Guardian Ad Litem

The Guardian Ad Litem is assigned to the cases and works for and with the courts to be the eyes and ears for the judge on each case. Their duty is to the “best interest of the child”. Honesty, integrity and focus on the child is critical to keep the child safe and improving. The Guardian Ad Litem is a paid attorney that is paid by tax payer dollars. In Arizona the Guardian Ad Litem becomes an arm of the Arizona Attorney General’s Office and works collaboratively to achieve the goals and objectives of that office. Often the only time they ever meet their client is in the courtroom. They get the majority of their information from the CPS Case Manager and the Arizona Attorney General’s Office. Their duty becomes synonymous with the states.

Arizona Legislature Point Person

This individual is hired by the State Senate and is entrusted to make sure that the Arizona Legislators do not get involved in CPS affairs. This individual is the funnel for legislators to bypass their constituent’s needs for help on anything involving CPS in any way. It is a control point and a separation wall to deny citizens representation by their elected officials. Legislators cannot become involved on individual cases but they are duty bound to become involved with CPS issues that are consistent across multiple CPS cases! But They do not!

Complicit Players

Arizona Ombudsman’s Office

This office is to identify and make recommendations about government issues regarding “systems” issues. This office does not take action to report issues with Child Protective Services inability to function. This department is well aware of the dysfunction within Child Protective Services and has for years. This is a political appointment by the Governor and confirmed by the Senate.

Law Enforcement

Law Enforcement is entrusted to protect and serve the people within their jurisdiction. This trust is consistently broken by law enforcement in Arizona when it comes to Child Protective Services. Law Enforcement is used to intimidate, harass, create fear, and to investigate parents and families. As many as nine investigations on one parent are performed, exculpatory evidence is set aside, and lying to a police officer is not a crime for CPS Case Managers, Physicians, or Hospitals.

Arizona Governor

The Governor of Arizona clearly must be fully aware and fully informed about the Child Protective Services agency issues and its years of misuse by physicians and hospitals. To believe that no single staff member, or legislator, or constituent, or committee, or law enforcement agency has never informed the various Governors of Arizona about the failings of Child Protective Service is disingenuous.

Arizona State Legislators

Arizona State Legislators represent “all” the people of Arizona and are entrusted to make laws that help and support all Arizonans. Many state legislators are fully aware and fully informed about the Child Protective Services agency and its years of misuse by physicians and hospitals.

Arizona Psychology Board

The mission of the Arizona Board of Psychologist Examiners is to protect the health, safety, and welfare of Arizona citizens by regulating the professions of psychology and behavior analysis. They consistently fail in their mission when it comes to Child Protective Service issues and the Psychologists brought to their board by way of complaints from Parents and Professionals.

Arizona Nursing Board

The Arizona Nursing Board is the single honest entity in Arizona when it comes to accountability of the licensing of nursing professionals in Arizona. They will make recommendations to the Arizona Department of Education and the Arizona Department of Economic Security to investigate improprieties they discover.

Arizona Department of Education

To serve Arizona’s education community, ensuring every child has access to an excellent education. It is not within their mission to work with Child Protective Services to work against parents. It is not their role: To withhold educational records from parents involved with Child Protective Services; Enable CPS Case Managers to enroll students with no educational records and no health records, Enable CPS Case Managers to make educational decisions against the IEP process or ignore the process; To not report suspected abuse or neglect by Foster Parents; To not investigate cases referred by other state agencies.

Arizona Procurement Office

This agency handles all documents, including contracts with the State of Arizona. They do a wonderful job, but their hands are tied. The State of Arizona bypasses the normal procurement process and bidding processes. The State of Arizona allows departments to contract under the cap and then add addendums to the contracts to avoid visibility and accountability. Contractors are allowed to exceed the financial caps on their contracts as well as individual requirements written into their contracts are ignored and contractors are allowed to work outside the scope of their contract.

United States Department of Justice (USDOJ)

The United States Department of Justice receives information and evidence of criminal activity, Medicaid fraud, crossing state lines and RICO. They have thousands of documents identifying who, what, when, and where along with documentation and yet take no action. They are fully aware and fully informed of the actions of Arizona’s Child Protective Services

United States Department of Education

The United States Department of Education is the only national level agency that is fully aware and fully informed of the activities of Arizona's Child Protective Services and the Arizona Department of Education. They consistently investigate complaints and consistently take the appropriate action to implement justice in the educational realm for Parents and children.

Federal Bureau of Investigations

The Federal Bureau of Investigations is fully aware and fully informed of the actions of Arizona's Child Protective Services. Individual investigators even admit that crimes are taking place. And yet they take no action to move forward with their investigations. They actually know for a fact that children are being abused sexually, physically, and emotionally and yet do not move to take action. They have been provided thousands of pages of documentation and still take no action.
