SOA

21 - 0 - 0 - 24

Nitrogen	(N)	Ammonium Form	20.5% w/w
Sulfur	(S)	as Sulfate	24.0% w/w
Equiv. Crude Protein	(-)	Minimum	126.0% w/w
Fluorine	(F)	Maximum	100.0mg/kg
Cadmium	(Cd)	Maximum	1mg/kg
Lead	(Pb)	Maximum	50mg/kg
Mercury	(Hg)	Maximum	5.0mg/kg

Estimated Density 900kg/m3

Quoted bulk fertiliser densities may vary by +/- 15%

HEAVY METALS

This product contains heavy metal impurities. Its use may result in accumulation of lead and mercury in the soil and may lead to residue limits in plant and animal products in excess of the maximum level specified by the Australia New Zealand Food Standards Code. Users are encouraged to seek further advice.

USE DIRECTIONS

This product should not be stored in a silo.

SOA can be used as a nitrogen fertiliser, and to supply sulfur in the readily available sulfate form. SOA contains insolubles and coating agents that may float on or settle to the bottom of mixing tanks, or block filters and nozzles, if applied in solution. This is most likely to be of concern in drip and trickle irrigation systems, and in foliar sprays, and of less concern where large irrigation nozzles are used, e.g. travelling irrigators. If using in solution for the first time, trial in small amounts before ordering in larger quantities. SOA should not be used as a spray adjuvant for agricultural chemical sprays. The granulation agents used in its manufacture may react adversely with active ingredients such as Glyphosate. SOA may be used as a source of sulphur in the preparation of stock-feeds and licks.

Refer to Incitec Pivot Fertilisers website about GranAm for more detailed advice on using this fertiliser as a Mineral Supplement for Ruminants.

This fertiliser is for dry application to the soil. Do not use in foliar sprays or fertigation.

WARNING - DO NOT STORE FERTILISER IN SILOS

Bulk fertiliser should only be stored for extended periods in purpose-built sheds or bunkers. Where this is not possible, Dellavedova Fertilisers recommends application as soon as practical after despatch - ideally within 48 hours.

Should this product not meet your expectations, please contact your fertiliser supplier before use. Fertiliser may burn and/or damage pasture and crops, and affect the health of grazing animals. Avoid direct ingestion of undiluted fertiliser by livestock. This information is intended for general informational purposes only and independent agronomic advice should be obtained before using this product. As climatic and soil conditions, application methods, irrigation, agricultural and grazing management practices are beyond the control of *Dellavedova Fertilisers and cannot be foreseen, in no event will Dellavedova Fertilisers and its related bodies corporate be liable for or accept any responsibility whatsoever for any direct, indirect, punitive, incidental, special or consequential damages (including but not limited to loss of revenue, production, crops, and livestock), in respect of the illness, injury or death of a person, damage to property (including of a third party), or any other loss whatsoever arising out of or connected with the use or misuse of this fertiliser, or its transport, storage, handling or application. Where Dellavedova Fertilisers and its related bodies corporate's liability cannot be lawfully excused, it and its related bodies corporate's liability shall be limited to the replacement of or cost of the fertiliser as supplied.

The buyer accepts and uses this fertiliser subject to these conditions.

SAFETY DIRECTIONS

Avoid ingestion and inhaling product. Contact with the eyes and skin must be avoided and wash immediately with running water if this occurs. Protective clothing, eyewear and dust masks should always be used when dealing with this product. For more safety directions, go to <https://bit.ly/ChemAlert> to search this product on ChemAlert.

CARE OF EQUIPMENT

This product can be corrosive to metals. Clean equipment after use, and follow manufacturer's maintenance advice.

Equipment used to transport and handle fertiliser should be thoroughly cleaned before being used for other purposes.

ENVIRONMENT

Dispose of packaging in accordance with state regulations.

This label complies with the Fertilizer Australia National Code of Practice for Fertilizer Description and Labelling.
