

## **GLOBAL MOVEMENTS TO UN SECURITY COUNCIL:**

### **REJECT US-FR-UK “STABILIZATION” FORCE THAT WILL STABILIZE OCCUPATION, APARTHEID & GENOCIDE IN GAZA**

We urgently appeal to the United Nations Security Council (UNSC) to reject the impending US-FR-UK resolution to stabilize the ongoing occupation and genocide of Gaza with a UN-approved multinational force to shore up the Trump so-called peace plan.

The Trump 20-point proposal was never a peace plan. It is a hostage exchange and temporary cease-fire (that has been continuously violated by Israel since it began), attached to a Gaza surrender program that disempowers the victims of genocide while defending the perpetrators, and ignoring the occupation and ethnic cleansing at the root of the crisis. In fact, Trump’s plan enables permanent occupation, limits Palestinian statehood to a mere aspiration, and puts Donald Trump himself in charge of economic development, providing a pathway to enrich himself and his real estate family and friends with his Gaza Riviera model of predatory development.

As expected, the Trump plan is maintaining genocidal deprivation of food, shelter, fuel and medical care. Health care providers and press are still prohibited from entering Gaza with no end in sight. And setting the tone for Israel’s longstanding disdain for peace agreements, Israeli soldiers’ first actions in the early hours of the ceasefire were setting fire to homes, food & Gaza City’s sole remaining sewage treatment plant. Then the soldiers celebrated this assault on social media, calling it “final touches” and “one last memory.”

Using the fully expected difficulty locating deceased hostages beneath the rubble as an excuse, Israel cut promised aid in half, with even fewer food trucks allowed in on the first day, a mere “drop in the ocean” of desperately needed relief. Further, Trump is threatening violence if Hamas won’t unilaterally surrender its right to self-defense (as guaranteed under Article 51 of the UN Charter) without the assurance of security or safety for the Palestinian people. We ask the UNSC to recall what happened when the PLO agreed to unilaterally give up its arms in Lebanon, resulting in the massacres of some 3,500 women, children and elders at the Sabra and Shatila refugee camps.

The security council must not “stabilize” the Trump-Netanyahu reign of terror with a UN-mandated “stabilization force”. This would control Gaza and its resistance on behalf of Israel, the US and their allies, as Western complicity in Israeli impunity continues.

We urge the UNSC instead to support the Colombian proposal (advocated by Palestinian & global civil society) for a “Uniting for Peace” mandated protection force that would focus exclusively on protecting Palestinian civilians, ensuring humanitarian aid, securing evidence of Israeli crimes, and assisting reconstruction.
