Mr. XXXXXXX
COO XXXXXXX

Subject: Protecting You, your Employees and Occupants from the Global Instability and Threats.

Dear XXXXX,

I hope this letter finds you well. I wanted to reach out to you about an important project I am involved with that helps shelter you and your employees and occupants from certain targeted events that the DHS, FBI, CIA, and NSA are pounding the drums over.

With all the past and newly elevated Global Instability due to the current Mid-East wars, perceived involvement in the Ukraine War and certain other perceptions of the West by terrorist organizations elsewhere, the above 3-letter Federal Agencies feel that the US and other Western Countries have an Extremely High Risk of Attack. The forecasted targets are Commercial Office Space, Data Centers, Public Transit and Sport Events due to the high concentration of people and overall impact from the event.

Many of the lower yield threats belong to the Lone Wolf Shooter where the use of guns will take place. Other higher yield measures discussed will be Improvised Explosive Devices (IED's) but the most feared and deadly will be Toxic Industrial Chemicals, Chemical Weapon Agents, Biological, and Radiological. The yields of human life lost will be in the 1,000's per targeted event.

I have built a company and assembled some of the brightest minds in these fields and have spent the past 2-years grinding through the various technologies that detect and protect best against such events. Please view the following video link which will yield a real good understanding of the threat and what mitigation measures my company has ready to deploy today for the purpose of countering these threats. Here is the link that details the anti-terrorism technology and how it works: [Threat Video](#)

After you have had a chance to view the video and assess how this type of event would affect your company, I would like to schedule a call or personally meeting to discuss how we can work together to mitigate these threats for you and your employees, occupants and customers.

Thank you and be safe,

Charles J. Maikish
