

Ride to the Cove, August 18, 2024

Meet at the Hwy 151 Kwik Star signed in, fueled up, kickstands up at 9AM

First leg will be to the Locust Street Hy Vee gas station. This is all 4 lane. There will be a potty break in Cascade at the Cascade BP.

The next stop is at the Hy Vee gas station. Those with smaller fuel tanks, I suggest you fuel up. There aren't any stations on the next leg.

There will also be no other stops on the next leg until we get to the Cove.

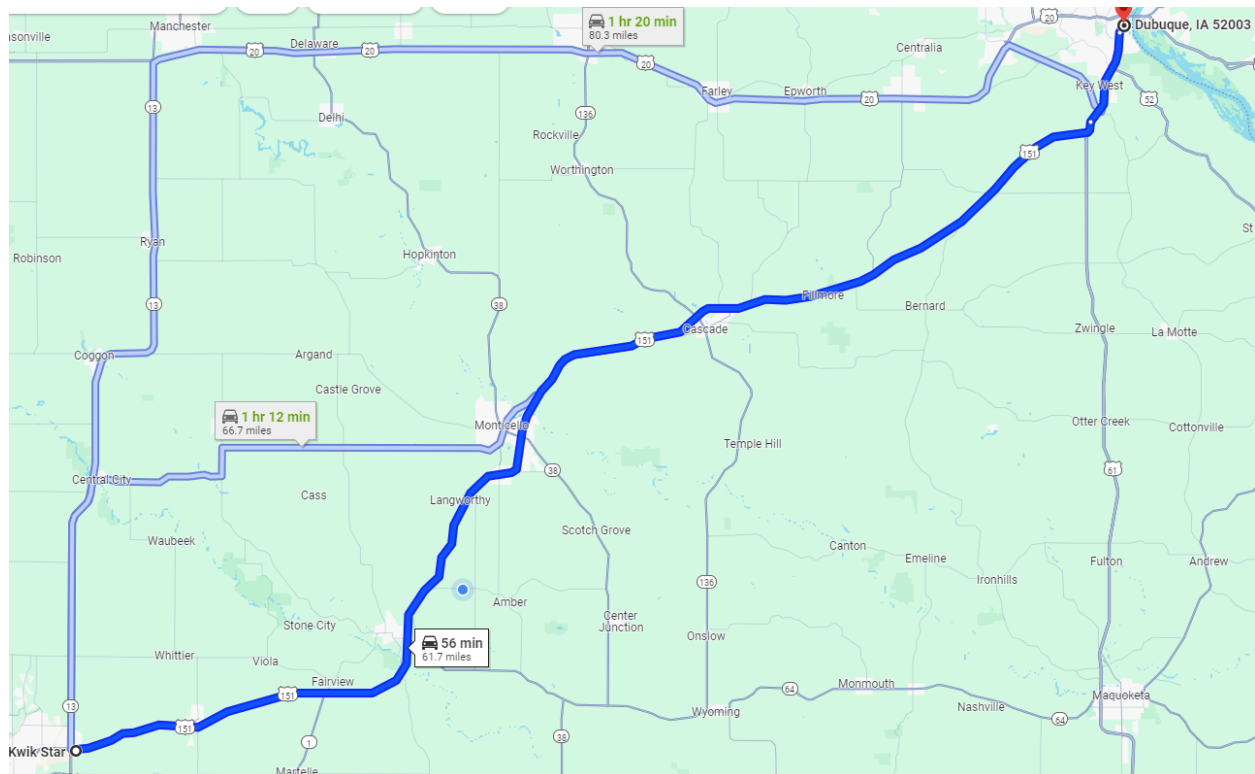

This stretch has some narrow roads, several tight curves and plenty of hills. So, if you do not like those kinds of roads this is not the ride for you. For those that do This part is fun and has great scenery.

There are two stop lights before the Hy Vee if we get split up. The Hy Vee gas station will be a good rally point.

There will also be two stop lights between the Hy Vee and the Highway 20 bridge over the Mississippi.

If we get split up again, I have picked a spot just East of East Dubuque where I will pull over on the side of the road (wide paved shoulder) to allow everyone to catch up.

For those that want we can go to Galena after the Cove.
