

Elite Molecular Solutions

Radiation Safety & Theranostics Consulting

Empowering Clinics with Professional Radiation Safety Support and Theranostics Program Guidance

Core Services – Building Your Radiation Protection Foundation

Radiation License Support – We take the stress out of regulatory paperwork by preparing, submitting, and maintaining your radioactive materials licenses.

Radiation Safety Programs – From daily operations to emergency protocols, we build programs that keep your staff safe and inspections stress-free.

Radiation Safety Officer (RSO) Services – Don't have an in-house RSO? We provide contract RSO coverage so you're always compliant.

Staff Training – Engaging, customized training ensures your team knows how to work safely and confidently with radiation.

Compliance Guidance – We prepare you for inspections, conduct mock audits, and resolve issues before they become costly.

Specialty Services – Supporting Advanced Care

Theranostics Program Setup – End-to-end support for cutting-edge therapies like Pluvicto™. We help integrate these services safely into your workflow.

Clinical SOPs – Ready-to-use, customizable procedures built from real-world experience in nuclear medicine and theranostics.

Facility Planning – Hot lab designs, shielding solutions, and exposure mapping to protect staff and patients.

Strategic Business Consulting – Market insights, financial modeling, and ancillary business support to help your clinic grow.

Why Clinics Choose Us

- Safety and compliance made simple.
- Proven experience in nuclear medicine and theranostics.
- Scalable support for small practices and large hospital networks alike.

Let's build your safer, stronger radiation program
together.
