

BRT night guard uses proven orthopedic concepts

- Posterior teeth do not touch
(minimizing muscle tension)
- Opens the oral volume 1/8-3/8"
(improves airway, reduces snoring)

- Advances lower jaw slightly forward
(decompresses TMJs)
- Concavity behind ramp positions tongue
(improves airway, reduces snoring)
- Ramp guides lower teeth evenly to midline
(reduces bruxism, grinding, jaw sliding)

- Curtails tooth movement
(excellent post orthodontic retainer)
- Durable, comfortable, high compliance

All materials used in the fabrication are FDA approved. US patent # 10,383,760 B2

BRT night guard has not been evaluated or endorsed by the FDA
