

BREAKSTONE CHEESE TASTY, WHOLESOME

**Cream Product Result of 45
Years of Experiments.**

Standing out from the ordinary variety of cheeses, Breakstone's Cream Cheese, the result of 45 years of experimenting by its founder, Isaac Breakstone, is delicious, nutritive and wholesome.

The cheese is packed by machinery and the ingredients used are of the highest quality obtainable, real pasteurized sweet cream, free from water, being present to the extent of 40 per cent of butter fat. The cream itself comes from inspected herds and its excellence is doubly safeguarded by pasteurization.

Regular medical examinations of the hundreds of employes of the Breakstone plants and periodic inspections of the immaculate buildings contribute to the excellence of the product.

It was only about five years ago that Mr. Breakstone undertook to qualify as one of the outstanding cheese makers of the country, after his years of experimenting.
