COMPANY PROFILE

Continues innovative changes and rapid transformation have been the theme of company history.

In 2001, This company established as a manufacturer of Submersible Pump Parts, then company has started to provide the satisfactory product to customer.

We, **Dev** Industries has built up a strong reputation in providing cost-effective and quality reliable casting solutions for our clients from all over the world, so reorder ratio from same customers are increased. Through out the history currently casting capacity of Dev Industries is 150 MT./month.

With the spirit of continual innovation and unceasing improvement, we are able to provide not only international standard products, but also customized ones.

We are a leading pioneer in the field of Submersible Pump Parts Manufacturer in India.

We warmly welcome your visit and cooperation with **Dev** Industries

COMPANY TODAY

Today, Dev Industries Is completely focusing on manufacturing Precision quality of sand casting with Latest Technologies.

WE STAND FOR

- ▲ Innovative Sand Casting solutions with shell moulding technology
- ▲ Complex solutions for integrated components
- ▲ Clear customer orientation
- ▲ Detailed quality – both in the process and in the Products
- ▲ Precision and reliability
- ▲ Efficient Parts development
- ▲ Unique experience of Shell Moulding and know-how
- ▲ Sustainable commitment to the environment and society
- ▲ Long lasting partnerships with our customer

FACTS

- ▲ Family owned company
- ▲ Year founded : 2001
- ▲ Number of employees : More than 200
- ▲ Turnover : 500 Million INR
- ▲ Materials : High-alloyed and low-alloyed steels
- ▲ Customers : The entire Pump Industry & Metalworking Industry
- ▲ Certified : ISO 9001:2008

QUALITY CONTROL

After many years of working experience together with customers from different regions and industries, we have adopted strict quality control managing system with ISO 9001-2008 certification granted by ISOQAR. We never stop the pursuit of constant improvement.

We're equipped with a lot of precise facilities such as

so as to promise the high quality.

Our staff members all bear in mind the importance of customer satisfaction, Consistent quality and a quick response are the keys to our customer satisfaction.

Capabilities :

- **Production** :- Casting Capacity up to 150 MT. Per month
- Machining Capacity up to 100 MT. Per Month
- **In House Tool Room** : For Manufacturing Precision Die/ Mould As per Customer Drawing
- **Heat treatment** : Can be done with Customer Specifications
- **Quality** : We meet our clients demands for better and uniform quality castings through our own very carefully formulated work practice programme
- **Other Facilities** : Vertical Broaching, Dynamic Balancing, Shot Blasting etc.
- **Packaging** : Packaging and labeling are also available
- **Materials** : Manufactured at Dev,
- Austenitic Stainless Steel : CF8, CF8M, CF8C, CF3, CF3M
Martensitic Stainless Steel : CA15 (410), CA40 (420)
Special Alloys, as per Customer specification or International Standard Specifications like; ASTM, DIN, SAE & AISI.

Product :

- All kind of Pump Products like
 - Impeller - Diffuser
 - Sleeve - Casing
 - Bowl
- General Engineering Parts
- Other Shell Moulding casting parts
- Product range : 100 gm to 50 kg.
- Minimum Thickness : 2.0 mm
- Dimensional Tolerance For Casting & Machining Parts : Tolerance as per customer Specifications or International Standard Specifications.
