

Mobile Home Residents of Playport Village in Costa Mesa are currently living in homes above contaminated Soil and Groundwater.

There are chemicals, PCE and TCE of high concentration in both, forming toxic Vapor 40 Feet below the homes that rises to the ground surface and penetrating the homes.

Many residents are sick with respiratory problems, eyes irritation, cardiovascular to name a few.

The neighboring businesses that polluted have done minor clean ups, and the majority of soil below and around homes remains contaminated.

The Aquifer Groundwater is highly compromised with high concentration of PCE and TCE, as high as 1500 Micrograms per liter in Total. This is way above the MCL levels of EPA standards of 5 Micrograms per liter.

Years have passed since the contamination started. Due to the lack of pressure by the state controlling agency The DTSC (Department Of Toxic Substances Control) both polluters CLA VAL and SCE Southern California Edison have cooperated in a very minor way, the response (A Limited Removal of Contaminated Soil on their sites).

To prevent further exposure to the chemicals by the residents, the community will appreciate the signing of this petition which increases the public pressure in forcing complete clean up of soil and Groundwater and a return to normal that is breathing clean air.

Thank You
