The Network

St. Croix is home to one of the largest communication hubs in the world and as such has emerged as a major player in global communication. In the late 1990s, Global Crossing developed a massive fiber Crossing developed a massive fiber-optic network comprising about 100,000 miles of network cables that connects more than 500 cities in 50 countries world-wide. This provides a wide connection point to North America, South connection point to North America, South America and Europe and Europe.
