

**FOR IMMEDIATE RELEASE**

## **Entrex executes agreement with St Croix Economic Development Initiative (“SEDI”) creating private Opportunity Zone Fund and Business Market**

**Boca Raton, Fl. May 28, 2019:** The Entrex Capital Market, a Joint Venture between Long Blockchain Corporation (OTC: LBCC) and Entrex, is pleased to announce its Blockchain enabled private trading market has executed a Letter of Intent to establish a national trading marketplace for private opportunity funds and businesses: [www.EntrexOZMarket.com](http://www.EntrexOZMarket.com).

“The SEDI team and their relationship with the USVI Economic Development Private-Public sector should establish a safe and credible marketplace which brings capital together with Opportunity Zone businesses and funds through regulated market constituents” said Stephen H. Watkins CEO of Entrex.

Anthony Weeks Managing Director of SEDI suggested; “We’ve seen the inefficiency of the opportunity zone marketplace and believe that working with regulated constituents across the capital market will help provide capital a place to find, research, track, manage and trade securities that are beneficial to communities and the investors that support them.”

“We expect to be launching with a series of nearly 50 funds from across the United States and the USVI which will bring economic development to the Opportunity Zones – providing a place for local community constituents to live, work and play. Our focus is to support the vision and mission of the bill and avoid the regentrification initiatives that simply displace community residents. Our hope is to use the Entrex Opportunity Zone Marketplace to not only to help investors access quality deals – but also hold funds accountable to the success of the original vision” continued Weeks.

“I believe Anthony and the vision of SEDI will help scale the private sector’s Opportunity Zone Funds and Business capital formation” said Watkins

### **About the Entrex Opportunity Zone Market:**

The Entrex OZ Market was founded to provide a national platform to find, research, track, manage and trade securities of opportunity zone funds and businesses. The platform works with regulated market constituents to create a safe and reliable marketplace for private funds and businesses to access capital. ### **About The Entrex Capital Market:**

Entrex was founded in 2001 as a “capital market system for entrepreneurial companies.” The LBCC joint venture will utilize Entrex’s intellectual properties and blockchain enabled technologies; built and proven over 17 years using IBM’s Domino and Hyperledger technology platforms. The Entrex platform originates, structures, offers, places, trades, settles and services debt and equities of entrepreneurial companies through regulated entities that serve investors and issuers. Working together with industry sector leaders and regulated market constituents allows investors to find, research, track, manage, and trade entrepreneurial securities while providing entrepreneurial companies access to capital.
