

CONCLUSION

The incidents in this booklet are to help you develop more situational awareness and allow you to have a long, safe flying career. The incidents are usually because pilots exceed their limits or the limits of the airplane they are flying. Flying is very safe if you “fly smart” and follow the rules!

“There are Old Pilots and Bold Pilots, but there are no Old Bold pilots.”

Keep your friends and family safe by pledging to adhere to your own set of personal flying limitations.

Take the time to complete a Personal Limitations Checklist (PLC) with your CFI. A sample is attached.

If you would like to talk about flying with limitations or the new Light Sport Aircraft please feel free to call me at 516-658-1847 or visit our web site www.nyjet.com/lisa or www.midislandair.com

Happy and Safe Flying!
