WHO WE ARE

Data Precision Systems is a Fairfax, Virginia-based technology consulting company providing data engineering and full-stack software development services to federal government clients. We specialize in delivering scalable, secure, and mission-critical technology solutions as a trusted subcontractor to major federal prime contractors. Our lean, experienced team brings deep technical expertise and direct accountability to every engagement.

CORE COMPETENCIES

Software Engineering

Full-stack application design, development, and deployment using Java, Python, and JavaScript

Cloud Engineering

Cloud architecture, migration, and management on AWS and Azure platforms

Systems and Database Engineering

System integration, database administration, and performance optimization across Windows and Linux environments

Data Engineering and Analytics

ETL pipeline development, data integration, and analytics using Spark, Databricks, Trino, Oracle, and NoSQL

Cybersecurity

Security assessment, implementation, and compliance support for federal environments

DevOps and Quality Assurance

Continuous integration and delivery, automated testing, and quality assurance across the full development lifecycle

DIFFERENTIATORS

- ▶ Experienced subcontractor under major federal prime contractors including Accenture Federal Services, GDIT, and NS-2
- ▶ Senior-level technical expertise on every engagement with direct access to decision-makers
- ▶ Minority-owned small business with active SAM.gov registration through May 2027
- ▶ Deep specialization in government data and software environments with proven mission-area knowledge
- ▶ Agile and cost-effective delivery without the overhead of large firms
- ▶ Nationwide distributed team providing flexible and responsive support
