10:45 am - 11:30 am	Face the Future: How Facial Recognition Technology Is Used in LA County	Introduction - Lt. Derek Sabatini, LASD Speaker - Blanca Rodriguez, Deputy with Los Angeles County, LASD, LACRIS Unit	Brand Ballroom (Glendale 5-8)	This presentation is an overview on the use of facial recognition by law enforcement agencies in Los Angeles County. Attendees will gain valuable insight regarding the requirements for accessing the FRT system and an overview of the POST certified course. Additionally, the current practices to ensure the FRT system is used ethically, responsibly, and with transparency will be shown.
11:30 am - 12:15 pm	From Records to Results: Harnessing Ethical AI to Transform Investigations	Charlie Schaeffer Industry Advisor	Brand Ballroom (Glendale 5-8)	Law enforcement agencies face two distinct user communities: Investigators searching for actionable leads, and Records Bureaus tasked with ensuring data integrity and compliance. Today, both groups are overwhelmed by backlogs, fragmented workflows, and the sheer scale of digital evidence and information. This session explores how agentic AI can ethically augment these roles—automating repetitive Records Bureau tasks such as quality control and data ingestion, while empowering investigators with faster, more accurate lead generation.  Attendees will gain insight into emerging use cases where AI can reduce caseload pressure, improve fingerprint search efficiency, and connect siloed data sources—without overstepping regulatory boundaries or replacing human decision-making. The discussion will also address the regulatory landscape, ethical safeguards, and the need for transparency and auditability to build trust.
