NOTICE OF MOTU PROPRIO INITIATION OF A PRELIMINARY SAFEGUARD MEASURES INVESTIGATION ON THE IMPORTATION OF CEMENT FROM VARIOUS COUNTRIES
(SG CASE NO. 01-2024)

Notice is hereby given that the Department of Trade and Industry (DTI) shall initiate, motu proprio, a preliminary investigation to determine whether increased imports of cement is causing or threatening to cause serious injury to the domestic industry. The cement covered by the investigation is classified under AHTN Codes 2523.29.90 and 2523.90.00. The period of investigation (POI) covered the years 2019 to June 2024.

Pursuant to Section 6 of the Safeguard Measures Act (RA 8800), "***x x x the Secretary may, motu proprio, initiate a preliminary safeguard investigation, if there is evidence that increased imports of the product under consideration are a substantial cause of, or are threatening to substantially cause, serious injury to the domestic industry.***"

A review of evidence made available to DTI shows:

1. that the volume of cement imports
    - in absolute terms, increased continuously from 2019 to 2023, the period of investigation (POI);
    - the increases compared with the previous years are: in 2020 at 10%, in 2021 at 17%, in 2023 at 5%;
    - in relative terms, the share of imports also increased during the POI, from 30% in 2019 to 47% in 2023 and 51% in 2024 (January to June).

2. that the domestic industry has suffered serious injury caused by increased imports based on the following:
    - during the POI, despite significant decline in market size, the market share of imported cement increased;
    - the share of imported cement grew from 10% and 17% in 2020 and 2021, respectively and captured the market by 5% in 2023;
    - while, share of domestic cement industry exhibited a declining trend from 78% share in 2019 to 68% share in 2023 and 66% share in January to June 2024;
    - the domestic industry's sales revenues declined from 2019 to 2023, from PhP79 billion in 2019 dropped to Php64 billion in 2023;

MASTER COPY

- the domestic industry's operating profit declined by 11% in 2020, increased by 12% in 2021, significantly declined by 69% in 2022 and declined further by 137% which recorded an operating loss in 2023;

- the weighted average landed cost of imports is lower than the average selling price of the domestic product indicating a price undercutting of 24%;
- cement manufacturers have been forced to reduce prices by 2% to compete with lower-priced imported cement.

3. that increased imports were the substantial cause of serious injury to the domestic industry based on the following:
    - the significant increase in the volume of imported cement preceded the serious injury to the industry in 2023;
    - the conditions of competition show that the market share of locally produced cement was essentially displaced during the POI as the share of imports in the domestic market significantly increased.

Further, Rule 5.2 of the Implementing Rules and Regulations (IRR) of RA 8800 provides that "***the Secretary when establishing that the application of a safeguard measure will be in the public interest shall take into consideration the following factors; among others: (i) whether the imposition of the provisional measure will result in political and economic crisis: and (ii) the extent to which such imposition will cause a shortage of a product under consideration in the domestic market***".

WHEREFORE, IN VIEW THEREOF, interested parties are invited to submit their comments and position on the matter including their views on whether the imposition of a safeguard measure is in the public interest. Submissions may be made to the Bureau of Import Services (BIS), Department of Trade and Industry, 3rd Floor, Tara Building, #389 Senator Gil Puyat Avenue, Makati City, within five (5) days from the date of publication of this notice.

The non-confidential report of the study containing evidence of the DTI's findings can be accessed at this link: https://bit.ly/SG_Notice-of-Initiation_Cement

REPORT ON THE MOTU PROPRIO INITIATION OF A PRELIMINARY SAFEGUARD MEASURES INVESTIGATION ON THE IMPORTATION OF CEMENT FROM VARIOUS COUNTRIES

INTRODUCTION

This is a report to determine whether there is sufficient evidence for the Secretary to motu proprio initiate a preliminary safeguard investigation on the increased importation of cement. Section 6 of RA 8800 (Safeguard Measures Act) provides: *"x x x the Secretary may, motu proprio, initiate a preliminary safeguard investigation if there is evidence that increased imports of the product under consideration are a substantial cause of, or are threatening to substantially cause, serious injury to the domestic industry x x x".*

The product subject to review is cement, which is classified under the ASEAN Harmonized Tariff Nomenclature (AHTN) Codes 2523.29.90 and 2523.90.00. To establish the trend in imports, the Department of Trade and Industry (DTI) relied on data obtained from the Bureau of Customs - Single Administrative Document (BOC-SAD).

In assessing serious injury, DTI requested the Cement Manufacturers Association of the Philippines (CeMAP) to provide evidence on the level of sales, production, profit/losses, productivity, capacity utilization, domestic production. These factors were evaluated to assess the impact of increased imports of cement on the domestic cement industry.

RA 8800 (The Safeguard Measures Act) requires evidence on the following elements:

a) Increased imports – increase in the volume of imports in absolute terms or relative to production.

b) Serious Injury or threat thereof – significant impairment in the position of the domestic industry after evaluation of all relevant factors, i.e. market share, level of sales, production, capacity utilization, employment, profit/losses, productivity, among others.

c) Causal link – serious injury to the domestic industry directly caused by increased imports.

I. THE PROCESS OF MOTU PROPRIO INVESTIGATION

I. A. Motu Proprio Investigation

The Secretary was guided by:

Section 6 and Rule 6.4.c of the Implementing Rules and Regulations (IRRs) of RA 8800:

Section 6 "In the absence of such a petition, the Secretary may, motu proprio, initiate a preliminary safeguard investigation, if there is evidence that increased imports of the product under consideration are a substantial cause of, or are threatening to substantially cause, serious injury to the domestic industry."

MASTER COPY

Further, Rule 6.4.c of the Implementing Rules and Regulations (IRRs) of RA 8800 states that, *"The Secretary may also motu proprio, initiate a preliminary safeguard investigation without having received a verified petition by or on behalf of a domestic industry if there is evidence that increased imports are a substantial cause of, or threatens to substantially cause, serious injury to the domestic industry."*

I.B. Documents Obtained

The DTI thru its Import Surge Monitoring System, recorded a surge in cement imports of combined portland and blended cement for the period covering year 2019 to 2024 (June) from several countries across the globe.

On 22 August 2024, the DTI informed the Cement Manufacturers' Association of the Philippines (CEMAP) of increased in imports of Portland cement from 2019 to June 2024. The DTI requested CEMAP to provide data on relevant economic factors for the evaluation of injury to the industry set under RA 8800. DTI asked CEMAP to provide information on domestic sales volume and value, cost of production, inventory, financial statement, export sales volume and value, return on sales, rated capacity, employment, domestic production, among others, to evaluate the effect of increased imports on the domestic cement industry.

On 28 August 2024, DTI received individual submissions from the following cement companies, Republic Cement Builders and Building Materials, Inc., Holcim Philippines, Inc., Cemex Philippines, and Eagle Cement Corporation.

On 04 September 2024, DTI requested for additional information such as copy of the financial statements, among others.

II. VOLUME OF IMPORTS

II.A. Determination of Increased Volume of Imports

Rule 7.2 a of the IRRs of RA 8800 provides, *"the Secretary shall essentially determine whether there has been an increase in the volume of imports, in particular, either in absolute terms or relative to production in the Philippines, The Secretary shall evaluate import data for the last five (5) years preceding the application to substantiate claims of significant increase in import volume. Provided, however, that in some cases, the period may be adjusted to cover a shorter period, if necessary, in order to take into account other considerations that will ensure the appropriateness of the chosen period, e.g. seasonality of product, availability of data or facility in verification of data."*

The table above presents the share of imports of cement in the Philippine market relative to domestic production.

During the POI (i.e. 2019 to June 2024), relative to domestic production, the volume of imports of cement increased from approximately 30% in 2019 to 35% in 2020 and 36% in 2021 to 41% in 2022. In 2023, the share of imports to domestic production increased further to 47% and 51% in 2024 (January to June) as domestic production declined.

Thus, cement imports relative to domestic production significantly increased during the POI.

III. THE PHILIPPINE CEMENT INDUSTRY

III.A Domestic Industry

Section 4 (f) of RA 8800 defines "domestic industry" as referring to the "*domestic producers, as a whole, of like or directly competitive products manufactured or produced in the Philippines or those whose collective output of like or directly competitive products constitutes a major proportion of the total production of those products*".

Rule 4.1(b) of the IRRs of RA 8800 further provides that: "(1) *in the case of a domestic producer which also imports the product under consideration, only its domestic production of the like or directly competitive product shall be treated as part of the domestic production, or (2) in the case of a domestic producer which produces more than one product, only that portion of its production of the like or directly competitive product may be treated as part of such domestic industry*".

▪ Republic Cement and Building Materials, Inc.	▪ Eagle Cement Corporation
▪ Holcim Philippines, Inc.	▪ Northern Cement Corporation
▪ CEMEX Philippines i.e. Apo Cement Corp & Solid Cement Corp.	▪ Mabuhay Filcement, Inc.

III.A.1 Cement Manufacturers which Provided Evidence

CeMAP Members composed of Republic Cement & Building Materials, Inc., Holcim Philippines Inc. and CEMEX Philippines (i.e. Apo Cement Corporation and Solid Cement Corporation) replied to the request of DTI to submit data/information on factors relevant to serious injury. These were consolidated to evaluate the effect of increased imports of cement on the domestic cement industry. Eagle Cement Corporation expressed its support to the motu proprio investigation being conducted by the DTI.

a) Republic Cement & Building Materials, Inc.

Republic Cement manufactures best-quality cement under the brand names - Republic, Fortune, Rapidset, Kapitbalay, Mindanao, and Wallmaster. They produce Type 1 Portland cement, Type 1P blended cement, Type N masonry cement, Pozzolan cement, premium Portland cement and concrete aggregates.

Republic Cement & Building Materials, Inc. has seven (7) strategically located manufacturing plants across the country -. Bulacan Cement Plant, Norzagaray Plant, Batangas Plant, Teresa Plant, Iligan Plant, Danao Plant and Bulacan Aggregates Plant. Its Head Office is located at Menarco Tower, 32nd Street, Bonifacio Global City, Taguig City.

b) Holcim Philippines

Holcim Philippines' product lines include Type 1 cement, Type 1P cement, masonry cement, dry mix (tile adhesive & skim coat), aggregates and specialty products include (conwood, paving and hollow blocks). Its cement products are sold in bags (40 kg.) and bulk that carries the "Holcim" brand name. It has cement manufacturing facilities in La Union, Bulacan, Misamis Oriental, and Davao. Its Head office is at Fort Bonifacio, Taguig City.

c) CEMEX Philippines (Apo Cement Corporation and Solid Cement Corporation)

Apo Cement Corporation produces and distributes Type 1, Type 1P, Type M, Type 2 and Type P cement and bulk under the APO brand. Its cement plant is located in Tinaan, Naga, Cebu.

Solid Cement Corporation sells Type 1, Type1P, Type N, Type M cement under the Island, Rizal, Palitada King and Semento Filipino brands. Its cement plant is situated at SitioTagbac, Barangay San Jose, Antipolo City, Rizal.

Both companies are subsidiaries of CEMEX Holdings Philippines.

Cement manufacturers that are not members of CEMAP are Eagle Cement, Northern Cement, Mabuhay Filcement and Goodfound Cement.

III.B. Exporters and Importers of Cement

The lists of exporters and importers of cement during the POI were identified based on the Bureau of Customs' Single Administrative Document (BOC-SAD). These lists are attached in Annexes A and B.

III.C. The Product under Investigation

Section 4 (h) of RA 8800 defines like product as *"a domestic product which is identical, i.e. alike in all respects to the imported product under consideration, or in the absence of such a product, another domestic product which, although not alike in all respects, has characteristics closely resembling those of the imported product under consideration".*

Pursuant to the above, a comparison of the imported cement with the domestic product was made to establish whether the locally produced cement is a like product to imported cement.

III.C.1. Domestic Product

There are two (2) types of cement that can be considered a like product to that of imported cement. These are Type 1 Ordinary Portland cement and blended cement.

Type 1 Ordinary Portland Cement (OPC) which has 90%-95% clinker content. It conforms to the American Society for Testing and Materials (ASTM) C 150 and Philippine National Standard (PNS) 07 requirements. It has faster setting time, high performance, consistent strength and compatibility to most chemical and mineral admixtures.

Type 1P, Type 1T, Type 1S, Type P and Type 1L are all blended hydraulic cements under one reference standard, PNS 63:2019.

PNS 63:2019 applies to the following types of blended cement that generally are intended for use as indicated. As per Clause 4.1 of PNS 63:2019, Type 1P and Type 1T and Type 1S, Type P and Type 1L are all classified under blended hydraulic cements for general concrete construction, to wit:

- Type 1S – Portland blast-furnace slag cement
- Type 1P – Portland-pozzolan cement
- Type P – Portland-pozzolan cement for use when higher strengths at early ages are not required
- Type 1L – Porland-limestone cement
- Type 1T – Ternary blended cement

III.C.1.a Uses and Application

Type 1 cement - Ordinary Portland Cement (OPC) and blended hydraulic cement are used for general construction purposes and concrete applications. They are available in 40 kg bag, 1MT bag, bulk and distributed through dealers, retailers, and cement plant/terminal for bulk orders.

III.C.1.b Composition of Raw Materials

The major raw materials in the domestic cement industry are clinker, supplementary cementitious materials (SCM) and gypsum.

III.D.1.Comparison between Imported and Domestic Product

Locally produced and imported cement are like products. Both have the same industrial application, are subject to the same industry standards (ASTM and PNS), have the same tariff classification, uses the same major ingredient (clinker from limestone) and have the same distribution channels.

III.E. Period of Investigation (POI)

The POI covers imports which entered the Philippine market from 2019 to June 2024. The domestic industry's performance for the same period was assessed to determine whether the increased imports are the substantial cause of the serious injury to the domestic industry.

IV. EVIDENCE OF SERIOUS INJURY

A. Determination of Serious Injury

Rule 3.1 of the IRRs of RA 8800 provides that "*a general safeguard measure under Chapter II of these IRRs shall apply where there is an increase in the quantity of a product being imported, whether absolute or relative to the domestic production, which is determined to be a substantial cause of serious injury or threat thereof to the domestic industry*".

Section 4 (o) of RA 8800 provides that "*serious injury shall mean a significant impairment in the position of the domestic industry after evaluation by competent authorities of all relevant factors of an objective and quantifiable nature having a bearing on the situation of the industry concerned. In particular, the rate and amount of the increase in imports of the product concerned in absolute and relative terms, the share of the domestic market taken by increased imports, changes in levels of sales, production, productivity, capacity utilization, profit and losses, and employment*".

Section 12 of RA 8800 further provides that "*in reaching a positive determination that the increase in the importation of the product under consideration is causing serious injury or threat thereof to a domestic industry producing like products or directly competitive products, all relevant factors having a bearing on the situation of the domestic industry shall be evaluated. These shall include, in particular, the rate and amount of the increase in imports of the products concerned in absolute and relative terms, the share of the domestic market taken by the increased imports, and changes in the level of sales, production, productivity, capacity utilization, profits and losses, and employment.*

Such positive determination shall not be made unless the investigation demonstrates on the basis of objective evidence, the existence of the causal link between the increased imports of the product under consideration and serious injury or threat thereof to the domestic industry. When factors other than increased imports are causing injury, such injury shall not be attributed to increased imports."

The total apparent Philippine market showed a declining trend during the POI, except in 2021. The apparent Philippine market for cement declined by 5% in 2020 due to a 9% drop in domestic industry sales and a 10% increase in imports. In 2021, the apparent Philippine market recorded its highest growth at approximately 14% as import grew by 17% and domestic industry by 12%. In 2022, apparent Philippine market declined by 11% and further declined by 6% in 2023 as import increased by 5% while domestic sales dropped by 10%.

During the POI, share of domestic cement industry exhibited a declining trend from approximately 78% share in 2019 to 68% share in 2023. In January to June 2024, share of domestic industry to total market recorded at 66%.

As the market size showed a declining trend, from 2019 to 2021, the share of imported cement recorded an increasing trend from 5.3million MT to 6.9million MT, respectively. In 2022, imported cement declined by approximately 3% but increased by 5% in 2023 despite the decline in market size.

The industry's capacity utilization followed a similar trend to the production. Capacity utilization declined by 9% in 2020 due to the onslaught of the pandemic. It slightly increased in 2021 by 3%, recording its second highest utilization at 75% which indicated recovery from the pandemic since there was increase in capacity, and the production volume recorded its highest on the said year. However, capacity utilization declined by 14% in 2022 and further by 10% in 2023. In the first half of 2024, capacity utilization declined by 2% compared to the 2023 level. F.3 Price Suppression

Price suppression refers to the extent to which the imported product prevents the domestic producer from increasing its selling price to a level that will allow full recovery of its cost of production.

Price suppression was recorded in 2023. The cost of production increased by almost 3% in 2023. However, since the average landed cost of imported cement from major sources was xxx, the domestic industry was not able to pass on the increased cost. The gross margin went down to 17% in 2023, indicating a price suppression of 16% compared to the 33% average gross margin for the last four years.

MASTER COPY

B.8.c Price Suppression

- Cost of production increased by almost 3% in 2023. Cement manufacturers were unable to pass on the increased cost in view of lower-priced imported cement.

VI. CAUSATION

The above evidence shows that serious injury to the domestic industry was caused by increased imports based on the following:

1. Significant increases in the volume of imported cement from 2019 to 2023 preceded the serious injury to the industry in 2023;

2. The conditions of competition showed that the market share of local cement producers decreased during the POI from 78% in 2019 to 68% in 2023, as imports in the domestic market displaced locally produced cement.

VII. THE WORLD TRADE ORGANIZATION AGREEMENT ON SAFEGUARDS

Article XIX (Emergency Action on Imports of Particular Products) of the General Agreement on Tariffs and Trade (GATT) 1994 provides that: *"If, as a result of unforeseen developments and of the effect of the obligations incurred by a contracting party under this Agreement, including tariff concessions, any product is being imported into the territory of that contracting party in such increased quantities and under such conditions as to cause or threaten serious injury to domestic producers in that territory of like or directly competitive products the contracting party shall be free, in respect of such product, and to the extent and for such time as may be necessary to prevent or remedy such injury, to suspend the obligation in whole or in part or to withdraw or modify the concession."*

The WTO Appellate Body in **Argentina – Footwear and Korea – Certain Dairy Products** established that safeguard measures may be applied only when the prerequisites of Article XIX of GATT 1994 and the conditions of the Agreement on Safeguards (both Multilateral Trade Agreements and as such are integral parts of the WTO Agreement) are clearly demonstrated.

Cement is not the subject of any tariff concession under the WTO Agreement. The investigation is also governed by RA 8800, the Safeguard Measures Act, and the terms and conditions of the Agreement on Safeguards.

VIII.a. Unforeseen Developments

The global cement industry, a cornerstone of modern construction, is grappling with a significant challenge: overcapacity. This phenomenon, characterized by the production of more cement than is demanded by the market, has far-reaching implications for both producers and consumers.

China has the largest excess capacity in the world, with 45% of the global overcapacity. China is the world's largest producer and consumer of cement, and is also the leading contributor to global cement emissions. https://www.linkedin.com/pulse/overcapacity-major-problem-world-cement-industry-all-emi-adiguzel#:~:text=Currently%20China%20has%20the%20greatest,to%20higher%20inland%20logistics%20costs.

India, the world's largest democracy and second-largest cement market, will reportedly struggle to exceed 70% capacity utilisation in the forthcoming 2020-2021 fiscal year, according to the credit ratings agencies ICRA, India Ratings and Crisil. https://www.globalcement.com/news/itemlist/tag/Overcapacity

Indonesia has a cement production capacity of 119.1 million tons, but domestic demand only reached 65.5 million tons in 2023. Indonesia is transitioning to more sustainable cement production, including investigating ways to make production carbon neutral. https://www.cemnet.com/News/story/175339/indonesia-remains-gripped-by-cement-overcapacity.html

Viet Nam is the second-largest cement-producing country in Southeast Asia. The cement industry is facing a capacity surplus due to lower demand from the construction industry. The cement industry is also a major contributor to global carbon dioxide emissions,' with global cement manufacturing producing 1.6 billion metric tonnes of CO2 in 2022. https://arc-group.com/asia-cement-industry/#:~:text=Production%20and%20consumption%20of%20cement,tons%20of%20production%20per%20year

VIII.b. Notification Requirement

Article 12.1 of the WTO Agreement on safeguards states that a Member shall immediately notify the Committee on Safeguards upon:

(a) initiating an investigatory process relating to serious injury or threat thereof and the reasons for it;

IX. RECOMMENDATIONS

Based on the above findings, there are indications that increased imports of cement are the substantial cause of serious injury to the domestic industry in terms of declining market share, production, sales, capacity utilization, profitability, price depression, suppression and undercutting.

Wherefore, premises considered, the Department, finds *prima facie* evidence to motu proprio initiate and conduct a preliminary safeguards investigation to determine whether cement is being imported into the Philippines in increased quantities and is causing serious injury to the domestic industry.

Let the notice of initiation of a preliminary safeguards investigation be published in two (2) newspapers of general circulation and individual notices be sent to all interested parties including the country members concerned.

IN THE MATTER OF THE APPLICATION FOR GENERAL SAFEGUARD MEASURE ON THE IMPORTATION OF LIQUIFIED PETROLEUM GAS (LPG) STEEL CYLINDER FROM VARIOUS COUNTRIES

(AHTN 2022 HEADING NO. 73.11)

x----------x

ORDER

On 23 July 2024, the Department of Trade and Industry (DTI) received the Tariff Commission's (Commission) Final Report on the Formal Investigation on the Imposition of Safeguard Measure Against Importations of Liquified Petroleum Gas (LPG) Steel Cylinder from various countries classified under AHTN 2022 Heading No. 73.11). The period of investigation (POI) is from 2017 to 2023.

The Commission, in accordance with the Safeguard Measures Act (RA 8800), and its Implementing Rules and Regulations (JAO No. 03, Series of 2000), concluded as follows:

1. The combined actual production volumes of petitioner Ferrotech Steel Corporation and FSC Metal Corporation accounted for 92% of total domestic production of LPG steel cylinders, as found by the Department of Trade and Industry in its preliminary determination. Since this 92% share is not only more than the majority domestic total production but also represents a very high proportion of the same, Ferrotech Steel Corporation and FSC Metal Corporation satisfy the definition of "domestic industry" as required by Section 4(f) of RA No. 8800.

2. Locally produced LPG steel cylinder, of welded type, is a "like product" to imported LPG steel cylinders, of welded type.

   Locally produced LPG steel cylinder, of welded type, is a "directly competitive product" to imported LPG steel cylinders, of seamless type.

3. LPG steel cylinders were imported into the Philippines in increased quantities relative to domestic production. The increase in the volumes of imports relative

to domestic production can be considered recent, sudden, sharp and significant enough.

4. Available industry-wide data on all relevant injury factors are insufficient to make a positive determination on serious injury or threat thereof to the domestic industry.

5. In the absence of a positive determination of serious injury or threat thereof, neither can the causal relationship between increased imports of LPG steel cylinder and serious injury or threat thereof to the domestic industry be established.

Considering that not all the elements for the imposition of a definitive safeguard duty were met, the Commission concluded its formal investigation and recommended that no definitive general safeguard measure be imposed on importations of the LPG steel cylinders subject of the investigation.

IN VIEW THEREOF, the petition for general safeguard measure on the importation of Liquified Petroleum Gas (LPG) Steel Cylinders falling under AHTN 2022 Heading No. 73.11 is hereby dismissed.

Accordingly, and pursuant to Section 13 of RA 8800 and Rule 13.3.c of the Implementing Rules and Regulations, all cash bonds that have been imposed and previously collected on shipments of LPG steel cylinders which entered or were withdrawn from warehouses in the Philippines for consumption, from 15 February 2024, the date of the effectivity of the Bureau of Customs (BOC), Customs Memorandum Circular No. 30-2024, shall be immediately returned to the concerned importer/s.

REPORT ON THE PRELIMINARY INVESTIGATION ON THE APPLICATION FOR AN ANTI-DUMPING DUTY ON IMPORTED GYPSUM BOARD FROM THAILAND

I. INTRODUCTION

This is a report on the preliminary investigation conducted by the Department of Trade and Industry (DTI) of the petition for anti-dumping filed by gypsum board manufacturer on the importation of Gypsum Board from Thailand.

On 24 November 2023, DTI accepted a properly documented application from the gypsum board manufacturer: Knauf Gypsum Philippines, Inc. (Knauf). The petition alleged that imports of gypsum board originating from Thailand are being dumped in the country and by reason thereof is causing material injury to the domestic gypsum board industry. On 28 November 2023, DTI notified the Embassy of Thailand in Manila that it has accepted the anti-dumping petition as properly documented. On 29 November 2023, DTI found merit to initiate a preliminary anti-dumping investigation. On 01 December 2023, a notice of initiation of the anti-dumping investigation was published in Business Mirror and Manila Standard. The domestic gypsum board manufacturer and the Embassy of Thailand were officially notified of the decision to initiate an investigation. Individual notices were sent to all interested parties on record.

This report addresses the issue of whether the pieces of evidence submitted by the applicant and respondents show that imported gypsum board are being dumped into the Philippine market. It also determines whether the dumping of the said products have caused material injury to the domestic gypsum industry. Furthermore, on whether the imposition of provisional measure to prevent further injury to the domestic gypsum board industry is necessary while the case is under formal investigation by the Tariff Commission.

The conduct of the preliminary investigation is based on Sub Section 3(f) of RA 8752, The Philippine Anti-Dumping Act of 1999 and its implementing rules and regulations. The investigation considered the pieces of evidence made available to DTI and submissions by identified exporters and importers.

II. The Gypsum Board Manufacturer's Petition

II.A Parties in the Petition

II.A.1. Domestic Industry

Section 3 (s) 4 of RA 8752 defines **"domestic industry"** as referring to the **"domestic producers as a whole of the like product or to those of them whose collective output constitutes a major proportion of the total domestic production of that product, except when producers are related to the exporters or importers or are themselves importers of the allegedly dumped product, the term 'domestic industry' may be interpreted as referring to the rest of the producers."**

Section 3 (b) paragraph 4 of RA 8752 further provides, **"That application shall be considered to have been made "by or on behalf of the domestic industry if it is supported by those domestic producers whose collective output constitutes more than fifty percent (50%) of the total production of the like product produced by that portion of the domestic industry expressing either support for or opposition to the application. However, no investigation shall be initiated when domestic producers expressly supporting the application account for less than twenty-five percent (25%) of total production of the like product produced by the domestic industry".**

The application was filed by Knauf Gypsum Philippines, Inc. which was incorporated and registered with the Philippine Securities and Exchange Commission (SEC) on 20 January 2016. II.B. Allegations

Petitioner alleged that gypsum board is being imported from Thailand at dumped prices. There was a substantial margin of dumping of gypsum board from Thailand for the period January 2022 to May 2023 based on the domestic wholesale and export prices as gathered by the gypsum board industry. They claimed that dumped imports of gypsum board began causing injury in 2019 to 2022.

Petitioner further alleged that the key impact of dumping has been in the gypsum board industry's declining revenues resulting in lower profitability. With declining prices and declining profit margins, the gypsum industry reduced its sales to price-sensitive customers as it was unable to match the unsustainably low prices offered by importers.

II.C Documents Received

Questionnaires were sent to importers and exporters that are considered interested parties to the case.

Public Version

II.C.1 Importer

Out of twenty-three (23) importers that DTI notified about the initiation of the investigation, five (5) responded to the notice.

1) **Budget Builders, Inc.**

On 21 December 2023, DTI received a letter from Budget Builders, Inc. informing the Bureau that their company was not engaged in the importation of gypsum board from Thailand or any other countries during the specified period of investigation.

2) **EHS Lens Philippines, Inc.**

On 28 December 2023, EHS Lens Philippines, Inc. sent an email to DTI stating that their company is engaged in manufacturing of ophthalmic lenses, glass mods, and spectacles. The company has not imported or used the subject product in manufacturing operation.

3) **Ure-shii Technologies, Inc.**

On 05 January 2024, DTI received a letter from Ure-shii Technologies, Inc. via email notifying the Bureau that the importation on record was the company's sole transaction made for their project which was already completed in December 2017. It was also reiterated that no other importation was recorded since 2017 to present, therefore, no relevant data can be provided to fulfill the importer's questionnaire.

4) **Saint-Gobain Philippines Co. Ltd.**

On 25 of January 2024, DTI received Saint Gobain Philippines Co Ltd Incs comments through email. They conclude that the complainant is not suffering any material injury, imports of Thai boards do not cause injury, injuries (if any) are caused by factors other than dumped imports, they say the complainant is not suffering any material injury, there is no evidence of price depression or price undercutting and that the complainant's production volumes and capacity utilization increased. Additionally, they also claim that certain niche boards should be excluded from the scope of the investigation such as perforated acoustic boards, high-density 'Habito' boards, and weather-resistant 'Glasroc X' and 'Glasroc H' boards because they have specific end uses and therefore cannot cause any injury to the complainant.

5) **Central Lumber Corporation**

On the 6th of February 2024, the response of Central Lumber Corporation was received through mail and delivered the complete documents to the Office. Central Lumber Corporation started in 1946. They argue that There is no dumping from there exporter Gypman Tech Co. LTD. There is no material injury or imminent threat thereof, there is no causal link between the alleged dumping and the alleged material injury or threat thereof to the Domestic industry. Furthermore, they claim Knauf dominating and monopolization of the market is in violation of the 1987 Philippine Constitution and the Philippine Competition Act (R.A 10667).

II.C.2 Exporter

On 06 of December 2023, DTI delivered the Notice and documents relevant to the anti-dumping investigation to the Embassy of Thailand in the Philippines and requested assistance in disseminating the documents to the Thai gypsum board exporters. 1) Thai Gypsum

On 25 January 2024, DTI received Thai Gypsums comments via email. They mention that, even if the complainant would suffer any injury, that injury is not caused by imports of Thai boards, but by imports from other countries, in particular Indonesia and Japan. They say that the complainant's sales volumes and values and market share increased significantly and that the Complainant is not suffering any material injury. They also mention that the impact of COVID-19 pandemic on demand for boards and on costs; and/or rising energy costs are also to blame. Thai Gypsum products remaining export sales are made up of a variety of niche Board types. No single such type accounts for more than 3% of export volume to the Philippines.

2) Gypman Tech Co. Ltd.

On 15 February 2024, DTI received the position paper of Gypman Tech Co. LTD through mail. Since the partnership with Central Lumber Corporation they exclusively supply and sell gypsum boards in the Philippines. They claim that the locally produced gypsum board have been increasing and that there is no causal link between the alleged dumping and the alleged material injury or threat thereof to the domestic industry. Regarding the product, Gypman mentioned a detailed explanation of the differences where those articles sold domestically are not identical to the articles exported to the Philippines. Furthermore, noted that while there was an increase in the liabilities of Knauf from 2021 to 2022, Knauf was sufficiently compensated by the increase in assets.

II.C.3 Foreign Embassy

a) Royal Thai Embassy - Department of Foreign Trade (DFT) of the Ministry of Commerce of the Kingdom of Thailand

The Royal Thai Embassy transmitted the position of the Kingdom of Thailand's Ministry of Commerce, specifically Department of Foreign Trade (DFT) to the DTI on 26 December 2023. If there is no sufficient evidence to justify initiation, the Secretary shall dismiss the petition and properly notify the Secretary of Finance, the Commissioner of Customs, and other parties concerned regarding such dismissal. The Secretary shall extend legal, technical, and other assistance to the concerned domestic producers and their organizations at all stages of the anti-dumping action."**

III.B. Preliminary Determination in the Context of the Anti-Dumping Law

In making a preliminary determination, Section 3(f) of RA 8752 and Section 7 (a) and (b) of its IRR provides, **"not later than thirty (30) working days from receipt of the answer of the respondent importer, exporter, foreign producer, exporting member-country and other interested parties, the Secretary shall, on the basis of the application of the aggrieved party and the answer of the respondent/s and their respective supporting documents or information, make a preliminary determination of the application for the imposition of an anti-dumping duty.**

In the preliminary determination, the Secretary shall determine the following:

(1) Price difference between the export price and the normal value of the article in question in the country of export or origin;

(2) The presence and extent of material injury or threat of injury to the domestic industry producing like product or the material retardation of the establishment of a domestic industry; and

(3) The causal relationship between the allegedly dumped product, commodity or article and the material injury or threat of material injury to the affected domestic industry or material retardation of the domestic industry."

Section 7 (c) of the Implementing Rules and Regulations of RA 8752 provides, **"the preliminary findings of the Secretary, if affirmative, together with the records of the case, shall be transmitted to the Tariff Commission for its immediate formal investigation within three (3) days from adopting the decision. However, if the preliminary findings of the Secretary are negative, the case shall be dismissed."**

IV. THE PROCESS OF INITIATION OF INVESTIGATION

IV. A. Acceptance of the Petition and Decision for Preliminary Investigation

In accepting the petition of the Philippine gypsum manufacturers, the Secretary was guided by Section 3(d) of the IRR of RA 8752 which provides, **"the Secretary shall, within five (5) working days from the date of his letter accepting the properly documented application referred to in Section 3.c.4, examine the accuracy and adequacy of the petition to determine whether there is sufficient evidence to justify the initiation of an investigation. The evidence of both dumping and injury shall be considered simultaneously (a) in the decision whether or not to initiate an investigation, and (b) thereafter, during the course of the investigation, starting at the earliest date when provisional measures may be applied.**

In assessing the sufficiency of evidence provided in the application, the Secretary will only satisfy himself that there is evidence that indicates dumping or the likelihood of dumping, and material injury based on the evidences submitted by the applicant.

If there is no sufficient evidence to justify the initiation of an investigation, the Secretary shall dismiss the petition and notify the Secretary of Finance, the Commissioner of Customs and other parties concerned regarding such dismissal".

IV.B. Preliminary Investigation Proper - Notice to parties and due process

Notice on the initiation of the preliminary investigation were published in the Manila Standard and Business Mirror on 01 December 2023 pursuant to Section 6 (a) of the IRR which states that **"within four (4) days after he makes the decision to initiate a preliminary investigation, the Secretary shall cause the publication of the notice of initiation of preliminary investigation in two (2) newspapers of general circulation. The date of publication shall be considered as day one (1) of the initiation of the investigation.**

The public notice of the initiation of an investigation shall contain, unless otherwise made available through a separate report, adequate information on the following matters:

i. **The nature of the allegedly dumped product;**
ii. **The country concerned;**
iii. **A summary of the particulars of the injury and basis of the allegedly dumping in the application;**
iv. **The time period for the submission of evidences or views to the Secretary;**
v. **The date of the initiation of the investigation; and**
vi. **The address to which representations by interested parties shall be directed."**

IV.C. Submission of Evidence and Position Papers

Section 3 (e) of RA 8752 states that **"Within two (2) days from initiation of the investigation and after having notified the exporting country, the Secretary shall identify all interested parties, i.e. protestee-importer, exporter and/or foreign producer, notify and require them to submit within thirty (30) days from receipt of such notice, evidences and information or reply to the questionnaire to dispute the allegations contained in the application. At this point, the respondent is given the opportunity to present evidences to prove that he is not involved in dumping. He shall furnish them with a copy of the application and its annexes subject to the requirement to protect confidential information. The notice shall be deemed to have been received five (5) days from the date on which it was sent to the respondent or transmitted to the appropriate diplomatic representative of the exporting member, or an official representative of the exporting territory. If the respondent fails to submit his answer, he shall be declared in default, in which case, the Secretary shall make such preliminary determination of the case on the basis of the information available, among others, the facts alleged in the petition and the supporting information and documents supplied by the petitioner."**

Section 6 (b) of the IRR of RA 8752 further provides, **"within two (2) days from the initiation of the investigation and after having notified the country of export or origin, the Secretary shall:**

i. **Identify all known interested parties i.e. importer, foreign exporter and/or producer, and notify them of the initiation of the investigation;**
ii. **Furnish them with a copy of the initiation report, petitioner's application, and its annexes, subject to the requirement to protect confidential information; and**
iii. **Provide them with a pro-forma respondent's questionnaire."**

The respondent is required to submit within thirty (30) days from receipt of such notice the completed pro-forma respondent's questionnaire and other evidence and information to dispute the allegations contained in the application.

Section 6 (d) of the IRR also states that **"The Secretary and the Commission shall provide opportunities for industrial users of the allegedly dumped product, and for representative consumer organizations in cases where such product is commonly sold at the retail level, to provide information which is relevant to the investigation".**

IV.D. Appreciation of Available Evidence

Section 6 (e) of the IRR of RA 8752 provides, **"The pro-forma respondent's questionnaire shall be used by both the Secretary and the Commission in their respective inquiries. Whenever any interested party fails to respond adequately to such questionnaire, is unable to produce information requested, refuses access to or otherwise does not provide any other information within the period allowed for the investigation, or otherwise significantly impedes the investigation, the preliminary or final determination of the conditions required in an anti-dumping investigation shall proceed on the basis of facts available. Even though**

the information provided by any interested party may not be complete in all respects, this shall not be disregarded provided the interested party is deemed to have acted to the best of his ability".

Section 6 (f) of the IRR of RA 8752 provides, "**if any evidence or information is not accepted by the Secretary, the supplying party shall be informed forthwith of the reason/s therefore, and shall be given an opportunity to provide further explanations: Provided, that this will not impede the investigation considering the period required for the Secretary to make a preliminary determination. If the explanations are not satisfactory, the reasons for the rejection of such evidence or information shall be given in the report containing the preliminary determination.**"

IV.E. Termination of Investigation

Section 3 (g) of RA 8752 and Section 9 of its IRR provides, "**the Secretary or the Commission, as the case may be, shall motu proprio terminate the investigation at any stage of the proceedings if the provisionally estimated margin of dumping is less than two percent (2%) of the export price or the volume of the dumped imports or injury is negligible. The volume of dumped imports from a particular country shall normally be regarded as negligible if it accounts for less than three percent (3%) of the imports of the like article in the Philippines unless countries which individually account for less than three percent (3%) of the imports of the like article in the Philippines collectively account for more than seven percent (7%) of the total imports of that article**".

V. ANTI-DUMPING DUTY: PARAMETERS FOR EVALUATION

V.A. The Concept and Purpose of Anti-Dumping

Section 2 of RA 8752 provides, "**it is hereby declared the policy of the State to protect domestic enterprises against unfair foreign competition and trade practices. Towards this end, substantive and procedural remedies available to domestic enterprises shall be strengthened and made responsive to recent developments in world trade.**"

V.B. The Elements Required by Law

Section 3 (a) of RA 8752 provides, "**whenever any product, commodity or article of commerce imported into the Philippines at an export price less than its normal value in the ordinary course of trade for the like product, commodity or article destined for consumption in the exporting country is causing or is threatening to cause material injury to a domestic industry, or materially retarding the establishment of a domestic industry producing the like product, the Secretary of Trade and Industry, in the case of non-agricultural product, commodity or article, or the Secretary of Agriculture, in the case of agricultural product, commodity or article (both of whom are hereinafter referred to as the Secretary, as the case may be), after formal investigation and affirmative finding of the Tariff Commission (hereinafter referred to as the Commission), shall cause the imposition of an anti-**

dumping duty equal to the margin of dumping on such product, commodity or article and on like product, commodity or article thereafter imported to the Philippines under similar circumstances, in addition to ordinary duties, taxes and charges imposed by law on the imported product, commodity or article. However, the anti-dumping duty may be less than the margin if such lesser duty will be adequate to remove injury to the domestic industry. Even when all the requirements for the imposition have been fulfilled, the decision on whether or not to impose a definitive anti-dumping duty remains the prerogative of the Commission. It may consider, among others, the effect of imposing an anti-dumping duty on the welfare of consumers and/or the general public, and other related local industries."

VI. THE EVIDENCE PRESENTED BY THE INDUSTRY

VI.A. The Product Subject to the Petition

As defined under Section 3 (s) 6 of R 8752, like product refers to **"a product which is identical or alike in all respects to the product under consideration, or in the absence of such a product, another product which, although not alike in all respects, has characteristics closely resembling those of the product under consideration"**.

VI.A.1. Domestic Product

a. Gypsum Board

The Applicant, Knauf Gypsum Philippines, Inc., produces a Gypsum Board which consists of a core of hardened extruded gypsum enclosed in a reinforcing layer of paper linerboard. The product is under both 6809.11.00 and 6809.19.90.

The board can be supplied in a range of thicknesses (normally from 6mm to 25mm), and any widths (normally from 600mm to 1400mm), and lengths (normally from 1800mm to 6000mm). It can also be supplied pre sawn into tile and panels into any sizes. The weight of the product is dependent on the thickness and core type, the standard core at 9mm thick is approximately 5.37kg//m^2 and for 12mm thick is approximately 7.89kg/m^2. The following table shows examples of the specific products sold in the Philippine market by the Applicant.

c. Composition of Raw Materials

The appearance of the product is paper surfaced, with the gypsum core being visible at the cut ends of the board. The chemical composition of the core is xxx (Gypsum), with minor amounts of other additives present.

The board can also be supplied in a number of core compositions for enhanced resistance to certain properties. Whilst these core compositions may contain additional reinforcing (e.g. fiberglass), they are primarily gypsum, and the fundamental reinforce gypsum board is the paper liner. The edges of the board are generally formed square, or with a recessed edge to allow flush jointing of two boards together, although other edge types are also possible. Typically, the major raw materials are liner paper, gypsum, energy and additives

e. Distribution Channels

The applicant solely sells through independent distributors. These independent distributors then on-sell to retailers, builders and contractors. Retailers sell to builders, developers and contractors. The contractors and builders/developer's co-ordinate the labor for the installation of the product.

VI.A.3. Comparison between Imported and Domestic Product

As defined under Section 3 (s) of RA 8752, like product refers to **"a product which is identical or alike in all respects to the product under consideration, or in the absence of such a product, another product which, although not alike in all respects, has characteristics closely resembling those of the product under consideration".**

It is necessary to compare the imported gypsum board and the domestic product to determine if they are like products. This is important in establishing whether the petitioners can rightly claim relief or protection against the allegedly dumped imported product.

The WTO Anti-Dumping Agreement does not provide any guidance apart from the definition in Article 2.6 (Section 3(s) of RA 8752) with respect to which specific characteristics should be considered when assessing likeness between the subject product and the domestic product.

It is a common practice for investigating authorities to establish criteria which are applied on a case-to-case basis as guidance in considering whether one product has characteristics closely resembling those of another product. These may include physical characteristics (size, materials, chemical composition, etc.), degree of commercial interchangeability, method of manufacture, functions of the product, industry specification and end-use, pricing, distribution and marketing and tariff classification, among others.

From the foregoing gypsum board from Thailand and the domestically produced goods are considered to be like products based on information provided by the petitioner and the declarations found in import entry documents reflecting the AHTN Codes and descriptions of the subject products. These documents show that the subject products and those that are domestically produced are identical, alike in all respects and are therefore like products within the purview of Section 3(s) of RA 8752 and its IRR.

Further, the responses submitted by exporters show that subject imported gypsum board have the same tariff classification, physical characteristics, use and application, same manufacturing process, among others as domestically produced gypsum board.

Therefore, the subject products and domestically produced gypsum board are like products as defined under section 3 (s) of RA 8752 and its IRR.

VI.B. Period of Investigation

The period of investigation (POI) for dumping is from January 2022 to May 2023, while the POI for injury is from 2019 to 2022 and updated to September 2023.

VI.C. Determination of Dumping Margins

Section 11 (a) of the IRR of RA8752 provides, **"the Secretary and the Commission shall determine the existence of dumping by making a fair comparison between the export price and the normal value of the allegedly dumped product, covering all transactions for the allegedly dumped product during the period of investigation (POI)."**

Section 11 b further provides, **"the comparison shall be made at the same level of trade, normally at ex-factory level, and in respect of sales made at the same time or as near as possible to the date of exportation. Due allowance shall be made in each case for differences which affect price comparability including differences in conditions and terms of sale, taxation, levels of trade, quantities, physical characteristics and any other differences which are also demonstrated to affect price comparability."**

VI.C.1. Normal Value

Section 3 (s) 3 of RA 8752 provides, **"Normal value refers to a comparable price at the date of sale of the like product, commodity or article in the ordinary course of trade when destined for consumption in the country of export."**

Section 3 (n) of RA 8752 further provides, **"if the normal value of an article cannot be determined, the provisions for choosing alternative normal value under Article VI of GATT 1994 shall apply"**.

During the initiation of investigation, DTI used the normal value or the domestic prices of gypsum board from Thailand gathered by the Philippine Trade and Investment Center-Thailand through online research from the Thailand Ministry of Commerce, Division of Trade and Economic Indices. The reference exchange rate was sourced from an online research[1]. The normal value from Thailand per sheet was converted into US dollar per kilogram using the estimated conversion rate provided by KGPI.

The following conversion of Gypsum Board sheet to kilogram are as follows: 9mm – 15.99 kg/ sheet and for 12mm – 23.49kg/ sheet.

[1] Baht/US$ exchange rate: https://www.bot.or.th/en/statistics/exchange-rate.htm

The table below shows the conversion of the normal value of gypsum board in Thailand from Baht per sheet to US$ per kilogram (kg).

Table 1: Conversion of Normal Value of Gypsum Board (Baht/sheet to US$/kg)

Gypsum Board	Unit	Average Value (Baht)	US$ per sheet	US$ per kg
Standard gypsum board size 120 x 240 cm. thickness 9 mm. roc	sheet	CONFIDENTIAL		
size 120 x 240 cm. thickness 12 mm. gypsy	sheet			

During the preliminary determination stage, DTI provided the respondents, exporters and importers, the opportunity to comment on the aforementioned normal values. Two (2) exporters provided information on their domestic prices of gypsum board from Thailand which used as basis in the calculation of normal value. The DTI determined whether there are sales to related parties or sales made at prices below cost. Sales below cost were excluded in the calculation of the normal value. Prices provided by the gypsum board manufacturers from Thailand were used as basis in the calculation of normal value.

With the provision of domestic selling prices in unit price per piece in Thai Baht, DTI arrived at a weighted average domestic selling price in US dollar by tabulating all the individual transactions during the POI (January 2022 to May 2023). DTI used the following conversion of Gypsum Board sheet to kilogram are as follows: 9mm – 15.99kg/ sheet and for 12mm – 23.49kg/sheet. DTI converted the said prices in US dollar using as reference exchange rate sourced from an online research.

Table below showed the normal value of gypsum board based on submitted data.

Gypsum Board	US$ per kg
Gyproc size 120 x 240 cm. thickness 9 mm.	CONFIDENTIAL
Gypline size 120 x 240 cm. thickness 9 mm.	
Gyproc size 120 x 240 cm. thickness 12 mm.	
Gypline size 120 x 240 cm. thickness 12 mm.	

Source: submitted information by the participating exporters

The DTI measured the reliability of the data submitted by the respondents in consideration of the following:

a) if the prices submitted by the respondents are either retail or wholesale prices;
b) comparability of normal value to export price; and
c) adjustments made to normal value and export price.

A fair comparison between the normal value and the export price must be made at the same level of trade, and in respect of sales made at as nearly as possible the same time.

MASTER COPY
Public Version

DTI considered the submitted normal value provided by the participating exporters/ manufacturers.

The Tariff Commission may gather complete normal value documents from all identified Thai exporters to further verify their domestic selling price of gypsum board in Thailand during the formal investigation.

VI.C.2. Export Price

Section 3 (s) 2 of RA 8752 states that **"Export price refers to (1) the ex-factory price at the point of sale for export; or (2) the F.O.B. price at the point of shipment. In cases where (1) or (2) cannot be used, then the export price may be constructed based on such reasonable basis as the Secretary or the Commission may determine."**

DTI used the electronic Single Administrative Document-Import Entry and Internal Revenue Document (SAD-IEIRD) generated through the database of the Philippine Bureau of Customs as the basis in the computation of export price during the initiation stage.

In the preliminary determination, the participating exporters/manufacturers provided data on their export prices for gypsum board sold in the Philippines for the POI. DTI evaluated the submission of the exporters. Further, DTI determined the export prices reflected in the BOC-SAD. Based on the shipments from BOC, the buyers and sellers agreed on payment terms or incoterms such as FOB, CIF and CFR.

The DTI determined whether there are sales to related parties and found that all export sales were made to unaffiliated Philippine importers. Export prices indicated in the submission include FOB and CIF. DTI considered the export prices provided by the Thai exporter and the data from the Bureau of Customs – Import Entry Declarations covering all of the shipments of gypsum board from Thailand during the POI as it reflects the actual import data. In the determination of weighted average export price, DTI adopted the actual export prices provided by the exporter and the BOC-SAD converted in USD/kg.

The Tariff Commission may gather complete export sales documents from all identified Thai exporters to further verify the export prices of gypsum board imported from Thailand during the formal investigation.

VI.C.3. Comparison between Export Price and Normal Value

Section 3 (n) paragraph 2 of RA 8752 states that **"If possible, an individual margin of dumping shall be determined for each known exporter or producer of the article under investigation. In cases where the number of exporters, producers, importers or types of products involved is so large as to make such determination impracticable, the Secretary and the Commission may limit their examination either to a reasonable number of interested parties or products by using samples which are statistically valid on the basis of information available to them at the time of the selection, or to the largest percentage of volume of exports from the country in question which can reasonably be investigated."**

Section 11 (a) of the IRRs of RA 8752 provides, **"Secretary and the Commission shall determine the existence of dumping by making a fair comparison between the export price and the normal value of the allegedly dumped product x x x"** and Section 11 (b) of its IRRs of RA 8752 **provides, "the comparison shall be made at the same level of trade, normally at the ex-factory level, and in respect of sales made at the same time or as near as possible to the date of exportation. Due allowance shall be made in each case for differences which affect price comparability including differences in conditions and terms of sale, taxation, levels of trade, quantities, physical characteristics and any other differences which are also demonstrated to affect price comparability.**

For comparability, the normal value in Thai Baht was converted into US$/kg. The exchange rate was sourced from the submitted information by the exporters.

Using the normal value provided by the cooperating exporter and the export prices appearing in the available BOC-SAD covering the POI, the computed dumping margins for gypsum board of 9mm, ranging from x x x to x x x or 5.45% to 34.72%, of the export price were recorded. For 12mm gypsum board, the computed dumping margins ranging from x x x to x x x or 4.65% to 33.81%, of the export price were recorded. Margins of dumping are above the *de minimis* requirement of 2% of export price.

VI.D. Determination of the Volume of Dumped Imports

Section 3 (g) of RA 8752 and Section 9(b) of its IRR further provides, "the volume of the allegedly dumped products from a particular country shall normally be regarded as negligible if it accounts for less than three percent (3%) of the total imports of said product in the Philippines unless countries which individually account for less than three percent (3%) of the total imports of the said product in the Philippines collectively account for more than seven percent (7%) of the total imports of that product."

Table above exhibited the dumped imports from Thailand against the total Philippine imports at 81% in 2021, 55% in 2022 and 68% in Jan-May 2023.

The volume of alleged dumped gypsum board product satisfies the *de minimis* volume requirement of three percent (3%).

VI.E. Evidence of Injury

Section 3 (i) paragraphs 1 and 2 of RA 8752 provides, "the presence and extent of material injury to the domestic industry, as a result of the dumped imports shall be determined on the basis of positive evidence and shall require an objective examination of, but shall not be limited to the following:

1. The rate of increase and amount of imports, either in absolute terms or relative to production or consumption in the domestic market;

2. The effect of dumped imports on the price in the domestic market for like product, commodity or article, that is, whether there has been a significant price undercutting by the dumped imports as compared with the price of the like product, commodity or article in the domestic market, or whether the effect of such imports is otherwise to depress prices to a significant degree or prevent price increases, which otherwise would have occurred, to a significant degree; and

3. The effect of the dumped imports on the domestic producers or the resulting retardation of the establishment of a domestic industry manufacturing like product, commodity or article, including an evaluation of all relevant economic

factors and indices having a bearing on the state of the domestic industry concerned, such as but not limited to, actual or potential decline in output, sales, market share, profits, productivity, return on investments, or utilization of capacity; factors affecting domestic prices; the magnitude of dumping; actual and potential negative effects on cash flow, inventories, employment, wages, growth, and ability to raise capital or investments.

The extent of injury of the dumped imports to the domestic industry shall be determined by the Secretary and the Commission upon examination of all relevant evidence. Any known factors other than the dumped imports which at the same time are injuring the domestic industry shall also be examined and the injuries caused by these factors must not be attributed to the dumped imports. The relevant evidence may include, but shall not be limited to, the following:

1. The volume and value of imports not sold at dumping prices;
2. Contraction in demand or changes in consumption pattern;
3. Trade restrictive practices and competition between foreign and domestic producers;
4. Developments in technology; and
5. Export performance and productivity of the domestic industry".

VI.E.1. PRICE EFFECTS

Section 12 a (2) of the IRR of RA 8752 provides for an examination of **"the effect of the importation of the dumped products on the prices in the domestic market for the like product, that is, whether there has been a significant price undercutting by the dumped products as compared with the price of the like product in the domestic market, or whether the effect of such dumped products is otherwise to depress prices to a significant degree or to prevent price increases which otherwise would have occurred to a significant degree. Price depression shall refer to the extent by which the domestic producer reduced its selling price in order to compete with the dumped product, while price suppression shall refer to the extent by which the dumped product prevented the domestic producer from increasing its selling price to a level that will allow recovery of its cost of production."**

VI.E.1.a. Price Undercutting

Price undercutting as defined in Section 2 (v) of the IRR of RA 8752 refers to the "extent at which the allegedly dumped product is consistently sold at a price below the domestic selling price of the like product". To establish the existence and extent of any price undercutting, the importer's (ex-warehouse) selling price of the imported product is compared with the price of the domestic product, usually at the ex-factory level.

VI.E.1.b. Price Depression

Price depression usually occurs when prices are lower than those in a market unaffected by dumping, usually in a previous period. As provided in Section 2(t) of the IRR of RA 8752, "price depression reflects the extent at which the domestic producer decreases its selling price in order to compete with the allegedly dumped product".

Table 4: Average Ex-work Price of Domestic Industry (P /MT)

VI.E.1.c. Price Suppression

Price suppression as defined in Section 2(u) of RA 8752 refers to "the extent by which the allegedly dumped product prevents the domestic producer from increasing its selling price to a level that will allow full recovery of its cost of production". It usually occurs when the company despite increases in cost (which normally should be translated into price increases) could not increase its prices to a level that will allow full recovery of its cost of production.

VI.E.2. Volume Effect

Article 3.2 of the Anti-Dumping Agreement and paragraph (i) subparagraph 1 of RA 8752, provides that "investigating authorities shall consider whether there has been a significant increase in dumped imports, either in absolute terms or consumption in the importing member."

Relative to total domestic production, import volumes of gypsum board were growing more rapidly from 2019 to 2020. The share of imports from Thailand relative to domestic production was recorded at more than 200% in 2019. This rose to more than 250% in 2020, then declined to more than 120% in 2021, and further dropped to less than 50% in 2022.

From Jan to Sep 2023, imports from Thailand accounted for more than 50% of domestic production, an increase from more than 40% during the same period in 2022.

VI.E.3. Economic Impact

Section 12 a (3) of the IRR of RA 8752 provides for an objective examination of "the effect of the importation of the dumped products on the domestic producers or the resulting retardation of the establishment of a domestic industry producing the like product, including an evaluation of all relevant economic factors and indices having a bearing on the state of the domestic industry concerned, such as, but not limited to, actual or potential decline in output, sales, market share, profits, productivity, return on investments, or utilization of capacity; factors affecting domestic prices; the magnitude of dumping; and actual and potential negative effects on cash flow, inventories, employment, wages, growth, and ability to raise capital or investments. This list is not exhaustive, nor can one or several of these factors necessarily give decisive guidance".

Section 12 (c) of the IRR of RA 8752 further provides, "the effect of the importation of the dumped products shall be assessed in relation to the domestic production of the like product by separate identification of that production based on such criteria as production processes, sales and profits. If such is not possible, the effect of the importation of the dumped products shall be assessed by the examination of the production of the narrowest group or range of products which includes the like product for which the necessary information is available."

The domestic industry started its operation in the last quarter of 2018. For the purpose of analyzing the profitability, 2019 was the base year. In 2020 (height of the Covid-19 pandemic), the industry's gross profit declined by 28% and further declined by almost 1% in 2021 despite the increase of sales revenue by 66%. The effect can be attributed to the increase of the cost of goods sold by 103% which is higher than the increase in sales. According to the domestic industry, gross profit remained below 2019 level due to inability of the domestic industry to recover escalating cost due to downward price

pressure from the parties importing the dumped product. In 2022, gross profit increased by 375% attributing to the higher rate of increase in sales revenue than cost of goods sold.

The industry recorded operating losses from 2019 until 2021. According to the domestic industry, they had to secure additional bank loans in 2021 in order to fund continued operations. Meanwhile, the domestic industry started to record operating profit in 2022. According to the domestic industry, the ramping up of local manufacturing which started in the last quarter of 2021 contributed to a better revenue. However, the industry claimed that their move to increase prices to cover rising cost of inputs and build an acceptable return has impacted sales volume which resulted to profitability levels lower than expected or desired, thus, affecting the company's cash flow and its ability to source capital and justify additional investments necessary for its growth.

VII. CONCLUSIONS

VII.A Determination of Like or Directly Competitive Product

- The product covered by the petition falling under AHTN Codes 6809.11.00 and 6809.19.90 described as Gypsum Board which consists of a core of hardened extruded gypsum enclosed in a reinforcing layer of paper linerboard. The board can be supplied in a range of thicknesses (normally from 9mm to 12mm), and any widths (normally from 600mm to 1200mm), and lengths (normally from 1800mm to 2440mm). Used for internal walls and ceilings, naturally heat and fire resistant, environmentally friendly and non-hazardous.

VII.B1. Dumping for Gypsum Board

a) Dumping Margins

- Comparison between the export price and normal value of gypsum board from Thailand for January 2022 to May 2023 indicated a dumping margin of 5.45% to 34.72% of export price for 9mm, and 4.65% to 33.81% of export price for 12 mm.

b) Volume of Allegedly Dumped Imports

- Dumped imports from Thailand against the total Philippine imports at 81% in 2021, 55% in 2022 and 68% in Jan-May 2023. The volume of alleged dumped gypsum board product satisfies the *de minimis* volume requirement of three percent (3%).

VII.B.3. Economic Factors

a. *Domestic Sales*

- Comparing the first three quarters of 2022 and 2023, sales volume declined by 7% while sales value slightly increased by 0.28%. In 2023, 60% of the demand was supplied by the domestic industry while 30% was captured by dumped imports from Thailand.

b. *Market Share*

- Market share of domestic product increased during the POI from xxx in 2019 to xxx in 2022.
- Share of imports from Thailand increased to 62% in 2020 and 2021. It declined to 49% in 2021 and dropped to 24% in 2022. However, comparing the first 3 quarters of 2023 to the same period in 2022 (Jan – Sep), Thailand's share of imports increased to 30% from 25%.

c. *Prices*

- Recorded price undercutting on the following thickness: for 9mm - 9% in 2022 and almost 12% in 2023 (Jan-Sept); for 12mm – 12% in 2022 and 11% in 2023. There is price suppression during the POI, from 2019 to 2021.

d. *Profits and Losses*

- Gross profit declined by 28% and further declined by almost 1% in 2021 despite the increase of sales revenue by 66%.
- Recorded operating losses from 2019 until 2021 but the domestic industry started to record operating profit in 2022.

e. *Return on Sales*

- ROS based on operating profit was recorded in 2022. Prior to that, loss on sales were recorded ranging from 25% to 35% during the years 2019 to 2021. ROS in the first 3 quarters of 2023 is higher compared to both the 3 quarters of 2022 and considering the full year of 2022.

f. *Production*

- In 2020, production declined by 45% as sales declined by 49%. In 2021, the acquisition of Boral business showed an improvement in volume towards the end of 2021, recording an increase of 60% year on year, as the industry started producing the boards locally in the 4th quarter.
- Comparing the first three quarters of 2022 and 2023, production increased by 2%.

MASTER COPY
Public Version

g. Capacity Utilization

- Increased capacity utilization since the start of the production in the last quarter of 2018 to the 3 quarters of 2022, except a decline of capacity utilization by 45% in 2020.

h. Employment

- In 2019, employment slightly declined by 2% and total employment remained even in the height of pandemic in 2020.
- Employment increased in 2021 by 64% and further by 4% in the first 3 quarters of 2022.

i. Productivity

- Increasing trend of labor productivity from the start of operation until 2022 except in 2020 where a decline of 45% in labor productivity was recorded.

j. Inventories

- Inventory volume increased year on year from 2019 to 2021 by 28% and 22% respectively.
- For the 3rd quarter ended in 2022 and 2023, inventory volume declined by 21% with a corresponding 9% increase in value due to increasing production cost.

VII.C. Other Causes of Injury

Substantial competition continued with imported product since the applicant invested and commenced local production in 2018. Injury exacerbated during 2020 when the entire region experienced a decline in demand and the overseas producers have excess capacity and having the advantage to fill the capacity as long as they cover the variable cost.

Without relief, local manufacturer will become unviable due to the poor margins, lack of return on investment and inability to grow volumes. Without a strong local manufacturer, the Thai manufacturers will have the ability to dictate future prices for the gypsum board in the Philippines.

The pricing level in the Philippine market is beginning to make it unviable for a local manufacturer to survive based on volumes achievable against Thai exports at current pricing levels.

VIII. CAUSATION

Volume of dumped imports declined from 42,301MT or 81% of the total Philippine imports in 2021 to 25,590 MT or 55% of the total Philippine imports in 2022. From January to May 2023, volume of dumped imports increased to 68%.

Imports from Thailand relative to production increased in 2020 but began to decline in 2021 and the three quarters of 2022. It can be noted that in April 2021, Knauf Group acquired the Boral Business, in effect, the import requirement of Boral Plasterboard Philippines Inc. was locally produced by Knauf starting the 4th quarter of 2021. Imports from Thailand relative to production in the 3 quarters of 2023 is still high at 51%.

Market share of domestic product increased during the POI from 30% in 2019 to 67% in 2022. However, comparing the 3 quarters of 2023 from the same period in 2022, market share declined to 58% from 66%.

The domestic industry suffered material injury in terms of declining market share, domestic sales, and capacity utilization rate in the 3 quarters of 2023 compared to the same period while seemingly the industry has recovered due to operating profit starting in 2022. The move of the industry to increase prices to recover increasing costs made the prices not competitive compared with the dumped products which undercuts the same at 9.25% for 9mm and at 12% for 12mm in 2022 and further by 12% for 9mm and at 11% for 12mm in 2023 (January to September).

Based on the above, the action of the domestic industry to acquire the Boral business resulted in an improvement to Knauf Gypsum Philippines, Inc.'s revenue and operations. However, evidence shows that the domestic gypsum industry suffered material injury before the acquisition, as indicated by its low market share (ranging from 23% to 40%), operating losses, and price suppression from 2019 to 2021, as well as price undercutting in 2022 and 2023 (January to September).

The gypsum local industry continued to suffer material injury from dumped imports even after the operations improvements resulting from the acquisition. The industry has lost a substantial share of its market, with 30% captured by dumped imports from Thailand in the first three quarters of 2023. The continued price undercutting of the domestic industry has made domestic prices uncompetitive, severely impacting its overall operations.

IX. RECOMMENDATION

On the basis of information available, it is concluded that there is reasonable cause to believe that:

a. the imported gypsum board with thickness of 9mm and 12mm from Thailand are being dumped;
b. by reason thereof, the dumped imports have caused material injury to the domestic gypsum board industry; and
c. the imposition of provisional measure is necessary to prevent further material injury to the domestic industry.

Section 8 (a) of RA 8752 and its IRR provides, **"if the preliminary finding of the Secretary is affirmative and to prevent further injury during the investigation, the Secretary shall immediately issue through the Secretary of Finance, written instructions to the Commissioner of Customs to impose within three (3) days from receipt of instructions, a cash bond equal to the provisionally estimated margin of dumping, in addition to any other duties, taxes and charges imposed by law, on the allegedly dumped product."**

WHEREFORE, premises considered, the DTI hereby imposes a provisional anti-dumping duty in the form of a cash bond on importations of gypsum board from Thailand, for a period of four (4) months commencing from the date of issuance of the Bureau of Customs of the relevant Customs Memorandum Order.

The computed dumping margins for gypsum board per product model/type are 5.45% to 34.72% of export price for thickness of 9mm and 4.65% to 33.81% of export price for thickness of 12 mm during the POI. For other exporters that did not participate during the preliminary determination, the highest dumping duties shall be imposed. (Annex B)

Let the notice of this Order be published in two (2) newspapers of general circulation and be furnished to the Department of Finance for the collection of the provisional anti-dumping duty by the Bureau of Customs in the amount stated above, against imports of gypsum board from Thailand.

Also, let the surety bond in the amount of Php500,000.00 be immediately released to the petitioner in view of the affirmative findings.

Individual notices shall likewise be sent to all interested parties including the country member concerned and the records of the case shall be forwarded to the Tariff Commission for formal investigation.

SO ORDERED.

ALL OTHERS CONCERNED

SUBJECT : CUSTOMS MEMORANDUM CIRCULAR (CMC) RELATIVE TO EXECUTIVE ORDER NO. 80, IMPLEMENTING THE PHILIPPINE SCHEDULE OF TARIFF COMMITMENTS UNDER THE PHILIPPINES-KOREA FREE TRADE AGREEMENT, AND MODIFYING THE RATES OF IMPORT DUTY ON CERTAIN IMPORTED ARTICLES

This has reference to the herein attached **Executive Order NO. 80** with the subject: *Implementing the Philippine Schedule of Tariff Commitments Under the Philippines-Korea Free Trade Agreement and Modifying the Rates of Import Duty on Certain Imported Articles.*

Relative thereto, during the 43rd Association of Southeast Asian Nations (ASEAN) Summit held on 07 September 2023, the Ministers of the Republic of the Philippines and Republic of Korea signed the PH-KR Free Trade Agreement (PH-KR FTA), which the President of the Philippines ratified on 13 May 2024 and concurred by the Senate through Senate Resolution No. 1188 dated 23 September 2024.

The PH-KR FTA aims to further strengthen economic partnership and bilateral trade between the Philippines and Republic of Korea by reducing and eliminating tariff restrictions in support of government efforts to manage competitive exclusion, encourage more foreign direct investments, and secure more preferential concessions than those currently available under existing agreements.

In accordance therewith, there is a need to modify rates of import duty on certain imported articles to faithfully comply with the Philippine Schedule of Tariff Commitments under the PH-KR FTA.

Significant sections of EO 80 provides, to wit:

> **SECTION 1. Schedule of Tariff Commitments.** All articles listed in the Philippine Schedule of Tariff Commitments under the PH-KR FTA, which is attached in EO No. 80, shall be subject to the

rates of import duties, at the same time of importation, indicated in the relevant columns herein.

SECTION 2. Applicable Tariff Rates. All originating goods from Republic of Korea listed in the aforementioned Philippine Schedule of Tariff Commitments under Section 1 hereof, that are entered into or withdrawn from warehouses or free zones in the Philippines for consumption or introduction to the customs territory, shall be levied the rates of duty as prescribed herein, subject to the submission of a Proof of Origin, in compliance with all applicable requirements under the PH-KR FTA.

The Tariff Commission may be requested to issue advance rulings on the tariff classification of goods to confirm the applicable rates of duty of particular goods subject to EO. No. 80, consistent with Section 1100 of RA No. 10863.

SECTION 3. Right of Recourse. Nothing in EO No. 80 shall preclude the Government of the Philippines from invoking its right of recourse to all trade remedy measures provided for in its laws, the PH-KR FTA, and other relevant international agreements in order to ensure the prevention of import surges or unfair trade practices.

Attached hereto is a copy of EO. No. 80 as Annex "A" for reference.

The list of articles subject to PH-KR FTA and their corresponding import rates may be accessed in the Bureau's website at www.customs.gov.ph and select "Issuances" on the upper corner, under the Customs Memorandum Circular column.

For records purposes, please confirm the dissemination of this circular throughout your offices within fifteen (15) days from receipt hereof.

Pursuant to Section 1100 of RA 10863 (CMTA)

1	AHTN 2022 CODE AND 2024 RATE/S OF IMPORT DUTY

4	DESCRIPTION OF GOOD

"VITAMIN PREMIX DAIRY 9402 MR2 NON-GMO"

Based on the product specifications, certificate of analysis, manufacturing process flowchart, and packing list submitted, subject article is a vitamin premix composed of vitamins (A, B_1, B_2, B_6, B_{12}, C, D_3, E, niacin, biotin, and folic acid), and maltodextrin (carrier). Packed in 25-kg aluminium-laminated bags in cardboard boxes, subject article is used in the manufacture of ambient dairy products.

5	REASONS FOR CLASSIFICATION

Heading 29.36 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers provitamins and vitamins, natural or reproduced by synthesis (including natural concentrates), derivatives thereof used primarily as vitamins, and intermixtures of the foregoing, whether or not in any solvent. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that this heading includes intermixtures of vitamins, of provitamins or of concentrates, such as, for instance, natural concentrates of vitamins A and D in various proportions, to which an additional quantity of vitamin A or D has been added subsequently. The products of this heading may be stabilised for the purposes of preservation or transport, among others, by adsorbing on appropriate substances (e.g., silicic acid), provided that the quantity added or the processing in no case exceeds that necessary for their preservation or transport and that the addition or processing does not alter the character of the basic product and render it particularly suitable for specific use rather than for general use.

In view thereof, subject article is classified under AHTN 2022 subheading 2936.90.00, with a Most Favoured Nation (MFN) rate of duty of zero; ASEAN-China Free Trade Area (ACFTA) rate of duty of zero, subject to submission of Certificate of Origin (CO) Form "E"; and Regional Comprehensive Economic Partnership (RCEP) Agreement rate of duty of zero, subject to submission of CO Form "RCEP" or Declaration of Origin (DO) issued by an Approved Exporter.

This ruling shall be valid for five years from the date of issuance and shall continue to apply unless the law, facts, or circumstances supporting this ruling have changed.

4	DESCRIPTION OF GOOD

"KURITA 44"

Based on the product catalogue, safety data sheet, certification of chemical substances, and photographs of the packaging submitted, subject article is a slime control agent composed of 5-chloro-2-methyl-4-isothiazolin-3-one (active ingredient), benzotriazole, magnesium salts, and water. It is in the form of a colourless to yellow liquid with a mild odour. Packed in 20-kg carbouys, 200-kg drums, and in 1,000-kg intermediate bulk container (IBC) tote tanks, subject article is used in recirculating cooling water systems to control the growth of bacteria, algae, and fungi.

5	REASONS FOR CLASSIFICATION

Heading 38.08 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers, among others, insecticides, rodenticides, fungicides, herbicides, anti-sprouting products and plant-growth regulators, disinfectants and similar products, put up in forms or packings for retail sale or as preparations or articles (for example, sulphur-treated bands, wicks and candles, and fly-papers). The pertinent Harmonized System (HS) Explanatory Notes (EN) state that these products are classified here in the following cases only, among others, when they have the character of preparations, whatever the presentation (e.g., as liquids, washes or powders). These preparations consist of suspensions or dispersions of the active product in water or in other liquids (e.g., a dispersion of DDT (ISO) (clofenotane (INN), (1,1,1-trichloro-2,2-bis(p-chlorophenyl)ethane) in water), or of other mixtures.

Furthermore, the products of heading 38.08 can be divided into the following groups, among others, disinfectants. Disinfectants are agents which destroy or irreversibly inactivate undesirable bacteria, viruses or other micro-organisms, generally on inanimate objects. Disinfectants are used, for example, in hospitals for cleaning walls, etc., or sterilising instruments. They are also used in agriculture for disinfecting seeds and in the manufacture of animal feeds to control undesirable micro-organisms. The group includes sanitisers, bacteriostats and sterilisers.

In view thereof, subject article is classified under AHTN 2022 subheading 3808.94.90, with a Most Favoured Nation (MFN) rate of duty of 3% ad valorem and the following applicable rates of duty under the various Philippine free trade agreements (FTA), subject to submission of the corresponding proof of origin:

4 DESCRIPTION OF GOOD

"OKERIN 2837H"

Based on the product data sheet, safety data sheet, and other technical information submitted, subject article is a rubber anti-ozonant in the form of white to amber-coloured free-flowing pellets with a characteristic waxy odor. It is composed of paraffin waxes, hydrocarbon waxes, and ethylene homopolymer (anti-blocking agent). Packed in 25-kg bags, subject article is an additive suitable for both natural and synthetic rubbers designed to protect rubber articles against ageing and damage caused by atmospheric ozone.

5 REASONS FOR CLASSIFICATION

Note 5 (c) to Chapter 34 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 states that in heading 34.04, subject to the exclusions provided, the expression "artificial waxes and prepared waxes" applies only to products of a waxy character with a basis of one or more waxes and containing fats, resins, mineral substances or other materials.

Heading 34.04 of the AHTN 2022 covers artificial waxes and prepared waxes. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that the waxes of this heading vary in chemical composition. Such waxes include waxes composed of two or more different waxes (except mixtures of mineral waxes which fall in heading 27.12) or one or more waxes with other material, for example, wax consisting of paraffin wax and polyethylene, used as coating material, wax composed of paraffin wax and stearic acid, used as raw material for making candles, wax composed of oxidised hydrocarbon wax and emulsifier; sealing wax and waxes of similar composition, however they are put up, other than products of heading 32.14.

In view thereof, subject article is classified under AHTN 2022 subheading 3404.90.90, with a Most Favoured Nation (MFN) rate of duty of 1% ad valorem; ASEAN-China Free Trade Area (ACFTA) rate of duty of zero, subject to submission of Certificate of Origin (CO) Form "E"; and Regional Comprehensive Economic Partnership (RCEP) Agreement rate of duty of zero, subject to submission of CO Form "RCEP" or Declaration of Origin (DO) issued by an Approved Exporter.

It consists of top and bottom sections and is fitted with a hermetic zipper, inverted pocket, and ports to allow gas hermetic fumigation (GHF). With a capacity of 0.6 metric tons (based on the weight of wheat or paddy rice), subject article is suitable for indoor and outdoor long-term storage of dry agricultural commodities, and is used to preserve the quality of stored grains, maintain their germination and vigor, and protect them against mold growth and insect infestation.

5	REASONS FOR CLASSIFICATION

Heading 39.26 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers other articles of plastics and articles of other materials of headings 39.01 to 39.14. 4 DESCRIPTION OF GOOD

"CASCADE POLYESTER SHAGGY ABSORBENT BATH MAT"

Based on the product composition, technical specifications, manufacturing process, product catalogue, and sample submitted, subject article is a tufted, absorbent polyester bath mat with a non-slip bottom. It is made by weaving the shaggy fabric into grey cloth and tufting using a tufting machine, followed by dyeing, coating with a layer of non-slip material, cutting to size, and sewing the edges. Available in different colours, subject article has dimensions of 40~45 cm x 60~75 cm (W x H) and is used to keep a person's feet dry after bathing and to prevent falls or slips.

5 REASONS FOR CLASSIFICATION

Heading 57.03 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers carpets and other textile floor coverings (including turf), tufted, whether or not made up. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that this heading covers tufted carpets and other tufted textile floor coverings produced on tufting machines which, by means of a system of needles and hooks, insert textile yarn into a pre-existing backing (usually a woven fabric or a nonwoven) thus producing loops, or, if the needles and hooks are combined with a cutting device, tufts. The yarns forming the pile are then normally fixed by a coating of rubber or plastics.

In view thereof, subject article is classified under AHTN 2022 subheading 5703.39.90, with a Most Favoured Nation (MFN) rate of duty of 15% ad valorem; ASEAN-China Free Trade Area (ACFTA) rate of duty of zero, subject to submission of Certificate of Origin (CO) Form "E"; and Regional Comprehensive Economic Partnership (RCEP) Agreement rate of duty of zero, subject to submission of CO Form "RCEP" or Declaration of Origin (DO) issued by an Approved Exporter.

4 DESCRIPTION OF GOOD

"INTECNA ELECTRO-COAGULATION SYSTEM, MODEL: DP4 BASIC PLUS"

Based on the technical specifications, brochure, instruction manual, purpose of the product, and photographs of the product submitted, subject article is a wastewater treatment machine. It consists mainly of a power supply, electro-cell tank, flocculation tank, filtration device, and treated water tank. The treatment process starts at the electro-cell tank where an electric current is passed through the metal electrodes immersed in wastewater to generate coagulants, destabilizing and aggregating suspended solids, heavy metals, and other pollutants into flocs. The wastewater then flows into the flocculation tank which facilitates the bonding of particles/contaminants before moving to the filtration device where various filtration methods (*e.g.*, sand filters and membrane filters) ensure that the water is cleared of particulates and other residual contaminants. Finally, the cleaned water is collected in a water tank, ready for safe release or for further processing. Subject article has a flowrate treatment capacity of 2 to 6 m^3/hr or 2,000 to 6,000 L/hr.

5 REASONS FOR CLASSIFICATION

Heading 84.21 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers, among others, filtering or purifying machinery and apparatus for liquids or gases. In view thereof, subject article is classified under AHTN 2022 subheading 8421.21.22, with a Most Favoured Nation (MFN) rate of duty of 5% ad valorem.

Furthermore, the Supplementary Explanatory Notes (SEN) to AHTN 2022 subheadings 1901.10.91, 1901.90.11, and 1901.90.91 state that medical foods are foods that are specially formulated and intended for the dietary management of a disease that has distinctive nutritional needs that cannot be met by normal diet alone. Medical foods are distinct from the broader category of foods for special dietary use and from traditional foods that bear a health claim. In order to be considered a medical food the product must, at a minimum, be a food for oral ingestion or tube feeding (nasogastric tube), be labeled for the dietary management of a specific medical disorder, disease or condition for which there are distinctive nutritional requirements, and be intended to be used under medical supervision.

4	DESCRIPTION OF GOOD

"CP STARTER HY D"

Based on the brochure, product specifications, product label, and Certificate of Product Registration from the Bureau of Animal Industry (BAI) submitted, subject article is a feed supplement in the form of a water-soluble powder. It is composed of vitamins A, B_1, B_2, B_6, B_{12}, C, D_3, E, and K_3, niacin, pantothenic acid, biotin, and folic acid, and has citric acid as carrier. Packed in 100-g and 1-kg (net weight) resealable bags, subject article is prepared by dissolving it in the drinking water of swine, chickens, and ducks, as a source of vitamins.

5	REASONS FOR CLASSIFICATION

Heading 23.09 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers preparations of a kind used in animal feeding. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that this heading covers sweetened forage and prepared animal feeding stuffs consisting of a mixture of several nutrients designed, among others, to achieve a suitable daily diet by supplementing the basic farm-produced feed with organic or inorganic substances (supplementary feed). This heading includes preparations for supplementing (balancing) farm-produced feed (feed supplements). Farm-produced feed is usually rather low in proteins, minerals or vitamins. The preparations devised to compensate for these deficiencies, so as to ensure a well-balanced animal diet, consist of proteins, minerals or vitamins plus additional energy feeds (carbohydrates) which serve as a carrier for the other ingredients. Although, qualitatively, these preparations have much the same composition as those in complete feeds, they are distinguished by a relatively high content of one particular nutrient.

In view thereof, subject article is classified under AHTN 2022 subheading 2309.90.20, with a Most Favoured Nation (MFN) rate of duty of zero and the following applicable rates of duty under the various Philippine free trade agreements (FTA), subject to submission of the corresponding proof of origin:

The products of heading 38.08 include disinfectants. Disinfectants are agents which destroy or irreversibly inactivate undesirable bacteria, viruses or other micro-organisms, generally on inanimate objects. Disinfectants are used, for example, in hospitals for cleaning walls, etc., or sterilizing instruments. They are also used in agriculture for disinfecting seeds and in the manufacture of animal feeds to control undesirable micro-organisms. The group includes sanitisers, bacteriostats and sterilisers.

In view thereof, subject article is classified under AHTN 2022 subheading 3808.94.90, with a Most Favoured Nation (MFN) rate of duty of 3% ad valorem; ASEAN-China Free Trade Area (ACFTA) rate of duty of zero, subject to submission of Certificate of Origin (CO) Form "E"; and Regional Comprehensive Economic Partnership (RCEP) Agreement rate of duty of zero, subject to submission of CO Form "RCEP" or Declaration of Origin (DO) issued by an Approved Exporter.

4	DESCRIPTION OF GOOD

"PECUTRIN™ (1 kg)"

Based on the Certificate of Product Registration from the Food and Drug Administration (FDA), manufacturing process flow diagram, product label, and photograph of the packaging submitted, subject article is a strawberry-flavoured feed supplement powder composed of vitamins A, D_3, and E, calcium, phosphorus, sodium chloride, magnesium oxide, zinc oxide, ferrous sulfate, and copper sulfate, among others. It is added to animal feeds to, among others, raise the natural resistance of swine and chickens against diseases, strengthen body constitution and promote bone formation, as well as improve the milking ability of lactating animals. Packed in 1-kg polyethylene bags, subject article is added continuously to swine and chicken feeds, at a dosage of 5 grams per kilogram of feeds, and to cattle and carabao feeds, at a dosage of 5 to10 grams per kilogram of feeds, especially during lactation.

5	REASONS FOR CLASSIFICATION

Heading 23.09 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers preparations of a kind used in animal feeding. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that this heading covers sweetened forage and prepared animal feeding stuffs consisting of a mixture of several nutrients designed, among others, to achieve a suitable daily diet by supplementing the basic farm-produced feed with organic or inorganic substances (supplementary feed). This heading includes preparations for supplementing (balancing) farm-produced feed (feed supplements). Farm-produced feed is usually rather low in proteins, minerals or vitamins. The preparations devised to compensate for these deficiencies, so as to ensure a well-balanced animal diet, consist of proteins, minerals or vitamins plus additional energy feeds (carbohydrates) which serve as a carrier for the other ingredients. Although, qualitatively, these preparations have much the same composition as complete feeds, they are distinguished by a relatively high content of one particular nutrient.

In view thereof, subject article is classified under AHTN 2022 subheading 2309.90.20, with a Most Favoured Nation (MFN) rate of duty of zero and the following applicable rates of duty under the various Philippine free trade agreements (FTA), subject to submission of the corresponding proof of origin:

4 DESCRIPTION OF GOOD

"CARROT JUICE POWDER 100% ORGANIC"

Based on the Certificate of Product Registration from the Food and Drug Administration (FDA), product specifications, certificate of analysis, material safety data sheet, composition statement, food safety plan, statement of use and application, and photograph and sample of the product submitted, subject article is a water-soluble, orange powder produced from the mechanical extraction of juice from the root of carrot (*Daucus carota*), followed by filtration, addition of dextrin (as preservative), and then processing into powder through BioActive Dehydration™, with silicon dioxide as processing aid. Packed in 20-kg cardboard boxes or 400-kg tote bags, subject article can be blended into smoothies or juices, added to capsules as a food supplement, or sprinkled over foods, to enhance a person's diet.

5 REASONS FOR CLASSIFICATION

Heading 20.09 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers fruit or nut juices (including grape must and coconut water) and vegetable juices, unfermented and not containing added spirit, whether or not containing added sugar or other sweetening matter. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that the juices of this heading may be concentrated (whether or not frozen) or in the form of crystals or powder provided, in the latter case, that they are entirely or almost entirely soluble in water. Such products are usually obtained by processes involving either heat (whether or not in a vacuum) or cold (lyophilisation). Provided they retain their original character, the fruit, nut or vegetable juices of this heading may contain substances, whether these result from the manufacturing process or have been added separately, such as products added to preserve the juice or to prevent fermentation (e.g., sulphur dioxide, carbon dioxide, enzymes) and standardising agents (e.g., citric acid, tartaric acid) and products added to restore constituents destroyed or damaged during the manufacturing process (e.g., vitamins, colouring matter), or to "fix" the flavour (e.g., sorbitol added to powdered or crystalline citrus fruit juices). However, the heading excludes fruit juices in which one of the constituents (citric acid, essential oil extracted from the fruit, etc.) has been added in such quantity that the balance of the different constituents as found in the natural juice is clearly upset; in such case the product has lost its original character.

In view thereof, subject article is classified under AHTN 2022 subheading 2009.89.99, with a Most Favoured Nation (MFN) rate of duty of 10% ad valorem.

This ruling shall be valid for five years from the date of issuance and shall continue to apply unless the law, facts, or circumstances supporting this ruling have changed.

4	DESCRIPTION OF GOOD

"BERGAPRIME BOOSTER POWDER (MEDIUM CHAIN TRIGLYCERIDE)"

Based on the Certificate of Feed Product Registration from the Bureau of Animal Industry (BAI), product brochure, material safety data sheet, production process flowchart, and photograph of the packaging submitted, subject article is a feed supplement in the form of a white powder. It is composed of medium chain triglyceride (from vegetable oil), glucose syrup, and milk protein. Packed in 20-kg (net weight) aluminium bag in a carton box, subject article is added to animal feeds or dissolved in water, to provide quick energy for maintaining physiological functions of young and/or sick animals.

5	REASONS FOR CLASSIFICATION

Heading 23.09 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers preparations of a kind used in animal feeding. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that this heading covers sweetened forage and prepared animal feeding stuffs consisting of a mixture of several nutrients designed, among others, to achieve a suitable daily diet by supplementing the basic farm-produced feed with organic or inorganic substances (supplementary feed). This heading includes preparations for supplementing (balancing) farm-produced feed (feed supplements). Farm-produced feed is usually rather low in proteins, minerals or vitamins. The preparations devised to compensate for these deficiencies, so as to ensure a well-balanced animal diet, consist of proteins, minerals or vitamins plus additional-energy feeds (carbohydrates) which serve as a carrier for the other ingredients. Although, qualitatively, these preparations have much the same composition as complete feeds, they are distinguished by a relatively high content of one nutrient.

In view thereof, subject article is classified under AHTN 2022 subheading 2309.90.20, with a Most Favoured Nation (MFN) rate of duty of zero and the following applicable rates of duty under the various Philippine free trade agreements (FTA), subject to submission of the corresponding proof of origin:

4 DESCRIPTION OF GOOD

"EXTRACT 51180"

Based on the certificate of analysis, product information form, production process flowchart, safety data sheet, photographs of the product and packaging, and sample submitted, subject article is a natural flavouring preparation in the form of a clear, colourless to pale yellow or green liquid. It is composed of apple *(Pyrus Malus)* fruit extract with ethanol obtained from the distillation/concentration of apple essence from the apple juice. Packed in 20-kg (net weight) plastic containers, subject article is used as an ingredient in the manufacture of alcoholic beverages.

5 REASONS FOR CLASSIFICATION

Heading 21.06 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers food preparations not elsewhere specified or included. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that the heading includes, *inter alia*, non-alcoholic or alcoholic preparations (not based on odoriferous substances) of a kind used in the manufacture of various non-alcoholic or alcoholic beverages. These preparations can be obtained by compounding vegetable extracts of heading 13.02 with lactic acid, tartaric acid, citric acid, phosphoric acid, preserving agents, foaming agents, fruit juices, etc. The preparations contain (in whole or in part) the flavouring ingredients which characterize a particular beverage. As a result, the beverage in question can usually be obtained simply by diluting the preparation with water, wine or alcohol, with or without the addition, for example, of sugar or carbon dioxide gas. Some of these products are specially prepared for domestic use; they are also widely used in industry in order to avoid the unnecessary transport of large quantities of water, alcohol, etc. As presented, these preparations are not intended for consumption as beverages and thus can be distinguished from the beverages of Chapter 22.

In view thereof, subject article is classified under AHTN 2022 subheading 2106.90.66, with a Most Favoured Nation (MFN) rate of duty of 7% ad valorem.

This ruling shall be valid for five years from the date of issuance and shall continue to apply unless the law, facts, or circumstances supporting this ruling have changed.

4	DESCRIPTION OF GOOD

"ABS RESIN PA757 NATURAL"

Based on the product data sheet, safety data sheet, packaging information, and photograph of the product submitted, subject article is an acrylonitrile-butadiene-styrene (ABS) copolymer with additives. It is in the form of natural or off-white granules. Packed in 25-kg bags, subject article is used as a raw material in the production of molded plastic articles.

5	REASONS FOR CLASSIFICATION

Note 6 (b) to Chapter 39 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 states that in headings 39.01 to 39.14, the expression "primary forms" applies only to blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.

Heading 39.03 of the AHTN 2022 covers polymers of styrene, in primary forms. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that this heading covers polystyrene and copolymers of styrene. The most important copolymers of styrene are styrene-acrylonitrile (SAN) copolymers, acrylonitrile-butadiene-styrene (ABS) copolymers and styrene-butadiene copolymers. Acrylonitrile-butadiene-styrene (ABS) copolymers, which have high shock and weather resistance, are used in the manufacture of parts and accessories of bodies for motor vehicles, of refrigerator doors, of telephones, of bottles, of shoe heels, of cases for machines, of water pipes, of building panels, of vessels, etc.

In view thereof, subject article is classified under AHTN 2022 subheading 3903.30.60, with a Most Favoured Nation (MFN) rate of duty of 3% ad valorem.

This ruling shall be valid for five years from the date of issuance and shall continue to apply unless the law, facts, or circumstances supporting this ruling have changed.

4 DESCRIPTION OF GOOD

"ETHYLENE-BUTENE COPOLYMER LLDPE UF1001DH"

Based on the technical specifications, nuclear magnetic resonance (NMR) laboratory test report, and safety data sheet submitted, subject article is an ethylene-butene copolymer resin, containing by weight less than 93% ethylene and more than 7% 1-butene, with slip and anti-block additives. It is in the form of translucent white pellets, with a melt flow index of 1.0 g/10 minutes at 190°C and a density of 0.918 g/cm^3. Packed in 25-kg bags, subject article is used in the manufacture of blown films for food packaging and of industrial lamination films.

5 REASONS FOR CLASSIFICATION

Note 4 to Chapter 39 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 states that the expression "copolymers" covers all polymers in which no single monomer unit contributes 95 % or more by weight to the total polymer content. For the purposes of this Chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit.

Furthermore, Note 6 (b) to this Chapter states that in headings 39.01 to 39.14, the expression "primary forms" applies only to blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.

Heading 39.01 of the AHTN 2022 covers polymers of ethylene, in primary forms.

In view thereof, subject article is classified under AHTN 2022 subheading 3901.40.00, with a Most Favoured Nation (MFN) rate of duty of 3% ad valorem; ASEAN-Korea Free Trade Area (AKFTA) rate of duty of 3% ad valorem, subject to submission of Certificate of Origin (CO) Form "AK"; and Regional Comprehensive Economic Partnership (RCEP) Agreement rate of duty of zero, subject to submission of CO Form "RCEP" or Declaration of Origin (DO) issued by an Approved Exporter.

This ruling shall be valid for five years from the date of issuance and shall continue to apply unless the law, facts, or circumstances supporting this ruling have changed.

4	DESCRIPTION OF GOOD

"DEHYDRATED PINEAPPLE CORE QUARTER DICE 7-9 mm"

Based on the product specifications, ingredients list, production process flowchart, certificate of analysis, packing list, information on product use, and photograph of the product submitted, subject article consists of diced dehydrated pineapple cores with a light to golden yellow colour, firm and soft texture, and typical taste and aroma of natural pineapple. It is produced by soaking pineapple core in sulphur dioxide (SO_2) solution, followed by cutting, boiling, soaking in sugar syrup and citric acid for taste adjustment, and drying. Packed in corrugated cartons containing four 5-kg heat-sealed polyethylene (PE) bags, subject article is used as an ingredient for breakfast cereals.

5	REASONS FOR CLASSIFICATION

Heading 20.08 of the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 covers fruit, nuts and other edible parts of plants, otherwise prepared or preserved, whether or not containing added sugar or other sweetening matter or spirit, not elsewhere specified or included. The pertinent Harmonized System (HS) Explanatory Notes (EN) state that this heading covers fruit, nuts and other edible parts of plants, whether whole, in pieces or crushed, including mixtures thereof, prepared or preserved otherwise than by any of the processes specified in other Chapters or in the preceding headings of this Chapter. It includes, *inter alia*, fruit preserved by osmotic dehydration. The expression "osmotic dehydration" refers to a process whereby pieces of fruit are subjected to prolonged soaking in a concentrated sugar syrup so that much of the water and the natural sugar of the fruit is replaced by sugar from the syrup. The fruit may subsequently be air-dried to further reduce the moisture content.

In view thereof, subject article is classified under AHTN 2022 subheading 2008.20.90, with a Most Favoured Nation (MFN) rate of duty of 10% ad valorem and the following applicable rates of duty under the various Philippine free trade agreements (FTA), subject to submission of the corresponding proof of origin:
