12D HOLISTIC WELL-BEING

WELCOME

**We have come together to establish Holistic Lifestyles that infuse our Beings
to Achieve what We are here to do - We are Evolving**

so are our needs for optimal @work experiences

WE PROVIDE SOLUTIONS FOR THOSE MOST COMPLEX EMPLOYEE HEALTH & WELL-BEING REQUESTS

ROSETO DELLA VITA provides access to and credible insight about simple changes in daily lifestyle that make sense for achieving workplace well-being - Our distinctive Holistic Wellness Services have immense rewards when applied to @work well-being - where We spend most of our energy, talents, and time:

- ✓ employee lifestyle benefit accounts that are holistic in all aspects allow for greater physical health, mental well-being, financial fitness, social/community connections, a sense of safety, and ethical business practices
- ✓ nature aligned-nutrient gap nourishment supports proper functioning of vital physical processes related to weight maintenance, insulin balance, mood stabilization, stress management, cognitive health, heart health, immune health, and sleep cycles
- ✓ financial wellness education and implementing heart-centered business practices can increase annual bottom-line profitability by >2.5 x projected goals
- ✓ peer recovery support services make considerable differences for those working through trauma-centered situations, not found in many other professional relationships - specifically addictions, excess alcohol use, and dysfunctional family system outcomes - peer recovery support specialists (PRSS) offer levels of acceptance, understanding, guidance, and validation by sharing one's own lived experience - this shared experience perspective is received differently - PRSS graciously help others to develop their own goals, create strategies for self-alignment, and take concrete steps towards building fulfilling, self-determined lives for themselves | these increased abilities to bring about changes in daily life and a sense of hope, have shown operational morbidity reduction from behavioral situations, treatment facility admission rates, time lost at work, substance-alcohol use, and depression - *a profound bridge gap !*

"I think you have intuitive empathy for others and are particularly trauma-informed in your approach.

You also can articulate the connection between trauma and addiction, which not everyone notices, and I think that's very helpful."

EH - Los Angeles, California
