## Setting up FindMy so you can track your iPhone

*Ever misplaced your iPhone and wished there was an easy way to track it down?*

### Problem statement:

You're about to head out when you realize your iPhone is missing. Instead of panicking, you use **Find My** to locate it instantly, saving time and worry.

### Before we get started:

Make sure you're set up to get the most out of these tips. First, check that your iPhone is running the latest version of iOS. To do that, go to **\*\*Settings > General > Software Update\*\***. If an update is available, install it to make sure you have access to the latest features I'll be covering. Once that's done, grab your iPhone and open your Settings app so you can follow along.

### Here's How:

- ☐ Open **Settings** on your iPhone.
- ☐ Tap your name at the top and go to **Find My**.
- ☐ Select **Find My iPhone**.
- ☐ Toggle **Find My iPhone**, **Find My network**, and **Send Last Location** to On.

This ensures your iPhone is trackable even when offline or in low battery.
