

Quick reference guide for acute care facilities

Cardinal Health™ Exam Gloves

Clinical staff safety is too critical to compromise

Healthcare workers within acute care facilities perform many different tasks, so they need a strategic portfolio of gloves to meet the needs of specific jobs to be performed, working environment, duration of use and potential hazards.¹ Cardinal Health recommends a product mix from two different categories: high use nitrile and specialty.

High use nitrile portfolio

Non-sterile exam gloves designed to serve a broad range of everyday clinical needs. Cardinal Health recommends selecting **two different products** within this category: one FLEXAL™ glove for general use and one ESTEEM™ glove for extra protection when needed.

Fingertip thickness (+/-0.2mil)	Product family	Size	Cat. no.	Features	Color	Texture/ cuff length	Chemo drug tested (ASTM D6978)	Chemical tested (ASTM F739)	Packaging	
General use										
3.7 mil	FLEXAL™ Comfort	XS	88FS01XS	<ul style="list-style-type: none"> • Dispensing film • >650% elongation • Low dermatitis potential 	Light blue				XS – L: 250 ea/bx; 10 bx/cs XL – XXL: 230 ea/bx; 10 bx/cs	
		S	88FS02S							
		M	88FS03M
