

Nysie Hurst

Paintings and post cards

Art is a story. It weaves emotion, observation, and experience all into one beautiful narrative. What inspires my work the most is how the Universe, through various means, does its best to maintain BALANCE. Full of color, form, and purpose. My Art is My Story, My Truth. It is a reflection of my experiences and all that I am.

My body of work consists of mixed media pieces that explore the relationship between the ebb and flow of physical energy, form and the process of creating. I attempt to use layers of color and pen to create a sense of fluidity within my work.

These particular watercolors were created during a time when the sunrise and set were my only companions. They helped bring light into my life.
