REAL GROWTH
REAL NUMBERS

A local restaurant chain in Indiana with two locations ignited their growth starting in 2017. The owner wanted a simple method to help bring their customers back and reward them for doing so. Using SMS Marketing was an obvious choice to use as the open rate is more than double that of email marketing.

Building a custom Mobile App was also out of the question due to the expense of such a process.

Within the first year of starting this platform, this business had **3,701 contacts** sign up.

Within that same first year, this merchant sent **58,576 texts** and saw their customers check-in **11,029** times and added **$48,328** in additional revenue.

Today, the local restaurant chain has **9 locations**, a total of **137,470 contacts** and we added an increase of **$7,015,255 in estimated revenue.**

Merchant Testimonial

“I have several stores with 3000+ customer sign ups!

“This program has been a great addition to my local store marketing. I have several stores with 3000+ customer sign ups! This large database allows me to increase revenue by sending out textALERTS about $5 Friday, promote additional offers and sell gift cards!”
