

# Tabit Guest

Reservation and waitlist management system

**Share customer information and preferences in real-time with staff to elevate the overall customer experience**

## Smart Seating

- Identify and recommend optimal table assignments for each guest
- Maximize seating capacity even during peak hours

## Know Your Customer

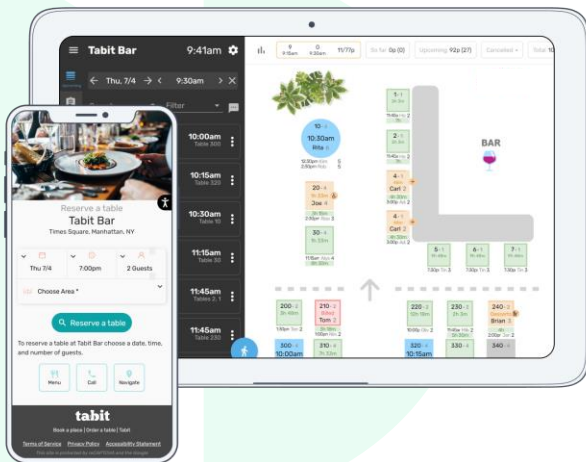

- Track guest history and preferences across all interaction points
- Fully synchronized with Tabit PAD, including guest seating notices, tracking of order and table status, and check payment

## Online Reservations

- Advanced algorithms recommend the appropriate table availability based on the guest's history and preferences to improve their overall experience
- Guests can submit, confirm, or change their reservation via a web interface that is configurable that matches your restaurant's branding

## Real-Time Reliable Data

- Accurately analyze table performance together with Tabit Insights
- View anticipated and actual reservation and waitlist statuses together with Tabit Chef
