for more information

Enhanced Order Process

- Conversational tableside ordering enhances the customer experience while streamlining the order process
- Intuitive workflow guides the server through the order-taking process
- Boost customer loyalty and increase profits with targeted promotions

Increased Sales

- Servers spend more time with their customers, promoting additional sales opportunities
- Automatically prompt servers to recommend up-sells and cross-sells during the order taking process
- Decrease table turn times by 12-15 minutes, increasing occupancy

Robust Reporting

- Consolidated insights into operations
- Make smarter decisions, backed up by better data

Efficient Training

- Train employees in minutes, instead of hours
- Intuitive workflows, coupled with extended product information available within the app, streamline menu familiarity and training for new and existing staff
