

Denver EV Charging Station Use Summary

Rev 01.18.2021

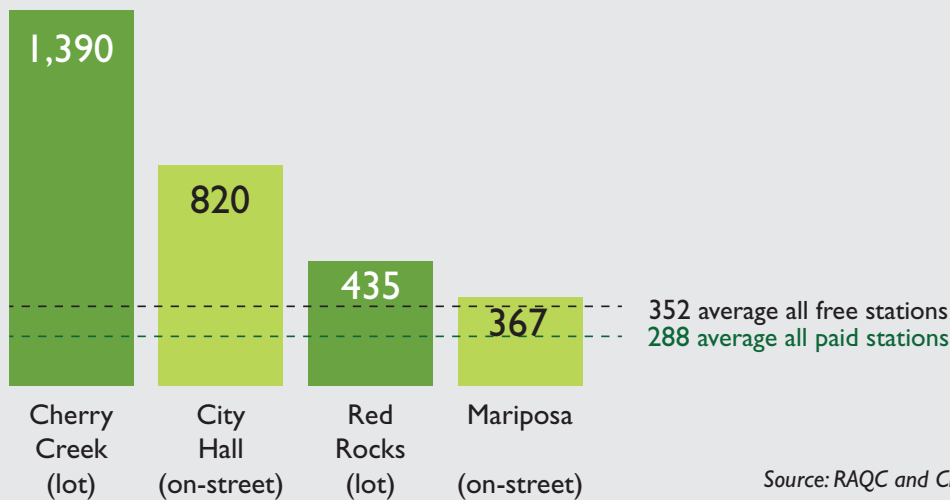

122 Total Charging Stations in Denver August 2020

Charging fees range from \$0.11 / kWh to \$0.44 / kWh

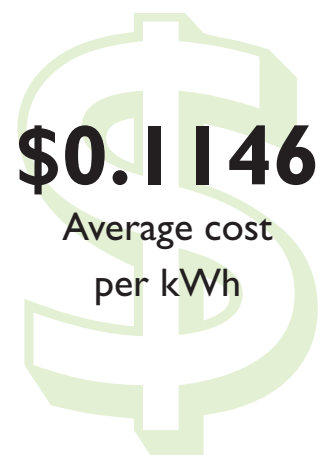

Source: Regional Air Quality Council (RAQC)

Average Monthly kWh for 4 Free Stations

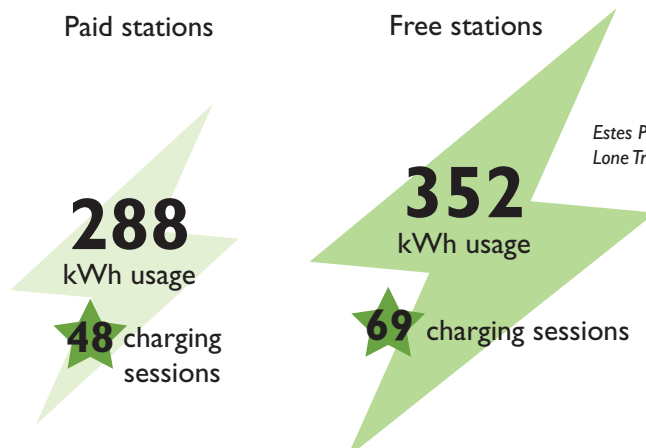

Source: RAQC and City and County of Denver

Electricity Rates in Colorado

Monthly Sessions + Kilowatts per Hour (on Average)

Estes Park: 56 monthly uses per stall;
Lone Tree Tesla Supercharger: 200 monthly uses per stall

Source: RAQC

This summary does not capture or illustrate that fact that the bulk of EV drivers either primarily charge at home or work. Many current drivers are using private networks (e.g. EVGo, Electrify America) or are Tesla owners using the Tesla Supercharger network. Rates and frequency of use are approximations and are not guaranteed.
