

# INNO 3000 E&B LPG DISPENSERS

- Solid
- Flexible and adjustable
- Efficient long life

Inno 3000 B&E LPG Dispensers series are designed for optimum durability. It has a long-lasting and powerful hydraulic structure with full flexibility at different flow rates and configurations.

Inno 3000 B&E LPG Dispensers have a special interface and are compatible with automation systems. It is the perfect solution for your retail and commercial applications both.

## INNO LPG SERIES FUEL DISPENSERS

Reliable Inno series LPG dispensers offer a quality construction with a solid structure for high strength. Protection and powder coated steel metal panels protect the dispenser from all weather conditions and scratches. In addition to high-quality hoses and nozzles, we ensure the durability of our products by using best-in-class components in all Mithra's dispenser series.

Flexible and adaptable to many configurations, our Inno series fuel dispensers offer complete flexibility with different flow rates, hose and biofuel compatibility. It supports all the leading communication protocols with proven, state-of-the-art innovative electronics and is compatible with most fleet management systems.

Inno series LPG dispensers know the value for your money and use a special interface and meter encoder. With its ergonomic hose and hanger structure, superior integrated and backlight display and ease of maintenance, the Inno series dispenser offers ease of use and low total cost of ownership.
