

INNO 5000

Multi products dispensing
range for retail applications

- Solid
- Flexible and adjustable
- Efficient long life

Solid and durable The Inno 5000 series fuel dispensers are designed for optimum durability. It has a long-lasting and powerful hydraulic structure with full flexibility at different flow rates and configurations.

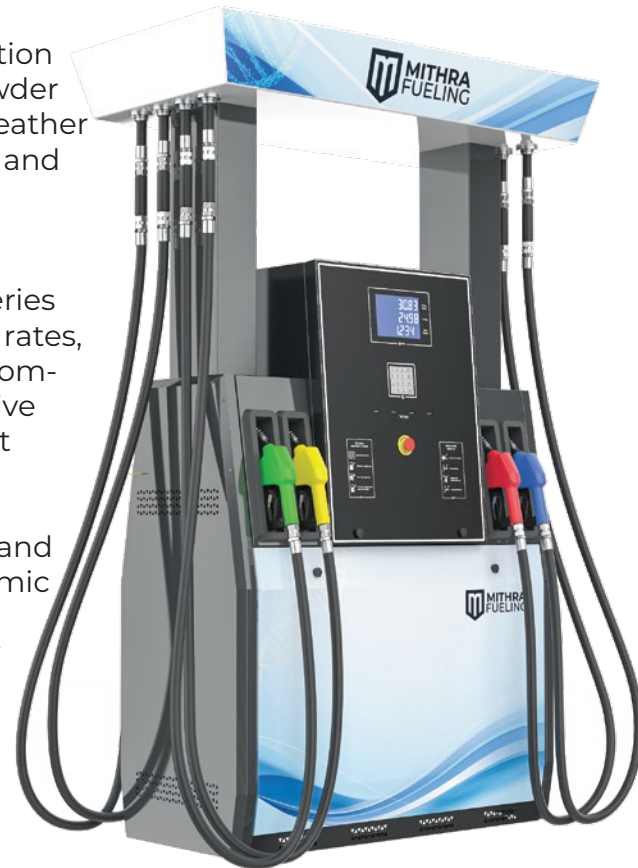

The Inno 5000 series fuel dispensers are also biofuel and ethanol compatible, safe and have a special interface and are compatible with automation systems. It is the perfect solution for your retail and commercial applications both.

INNO 5000 SERIES FUEL DISPENSERS

Reliable Inno series fuel dispensers offer a quality construction with a solid structure for high strength. Protection and powder coated steel metal panels protect the dispenser from all weather conditions and scratches. In addition to high-quality hoses and nozzles, we ensure the durability of our products by using best-in-class components in all Mithra's dispenser series.

Flexible and adaptable to many configurations, our Inno series fuel dispensers offer complete flexibility with different flow rates, hose and biofuel compatibility. It supports all the leading communication protocols with proven, state-of-the-art innovative electronics and is compatible with most fleet management systems.

Inno series fuel dispensers know the value for your money and use a special interface and meter encoder. With its ergonomic hose and hanger structure, superior integrated and backlit display and ease of maintenance, the Inno series dispenser offers ease of use and low total cost of ownership.

TECHNICAL SPECIFICATIONS

Standard Features

- 1 or 2 Product with up to 10 hoses and 4 displays (2 fuelling positions)
- Combi LCD displays with LED
- Petrol, Diesel, E15 and Biodiesel (100%)
- Mithra pumping unit and piston meter with e-calibration
- Powder coated steel housing
- High quality hanging hardware
- Pipe hook
- Stainless steel cover around nozzle boot
- Secure Interface Pulser
- 7 digit electro mechanical non-resettable totalisers

Options

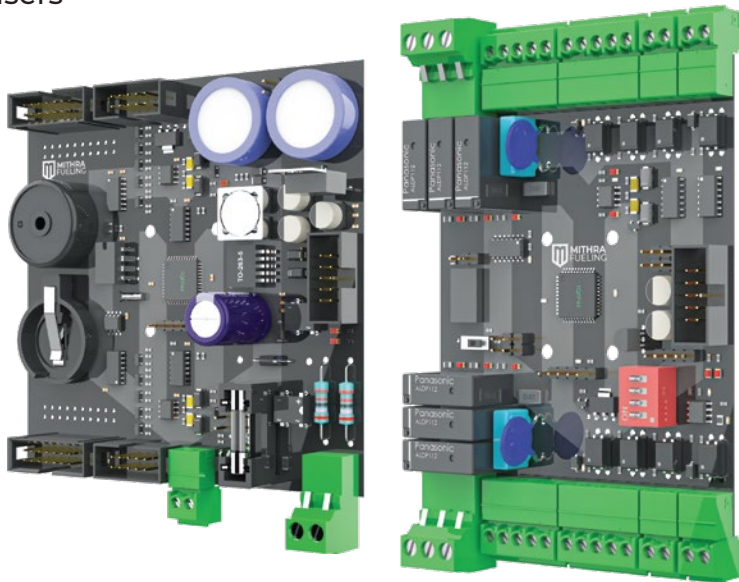

- High flow (80 LPM) and ultra high flow (120 LPM) capacities
- Low temperature hose and nozzles
- Optional heater for below -20°C
- Stainless steel hose mast and front panels
- Vapour recovery and monitoring
- Automatic temperature compensation
- Satellite connection for ultra high flow models
- Volume display for commercial sites

RETAIL AND COMMERCIAL FUEL DISPENSING SOLUTIONS

Dispensers

Motor 3 Phase	400V, 50 Hz / 60Hz
Motor 1 Phase	220V-240V, 50 Hz. / 60 Hz.
Meter Unit	Mithra positive displacement meter with electronic calibration
Pumping Unit	Mithra gear or vane type pumping unit
Electronics	Mithra Innovator EFSC +
Communication Protocol	Mithra - 2 Wire RS-485
Environmental	-25°C to +55°C
Approvals	ATEX, MID, CE, ISO, INTERTEK
Standard Flowrate	45 LPM
High Flowrates	80 LPM / 120 LPM

The contribution of selling two different products on a single island will add innovation to your station. As MithraFueling, we continue to develop our technologies for you.
