Nintex K2 Report Designers

End-User Report Designers for K2 Smart-Form

Power users demand options and want control over the information they distribute within the enterprise. The need to meet these requirements can be daunting, especially for reports. With its powerful report designers, K2 Reporting makes it easy to integrate runtime report. You can create reports with point and click ease and use them in a Web or Mobile app.

Whether you need a feature-rich Windows designer or prefer to use a 100% web-based tool, the K2 Reports Suite includes everything you'll need to empower your users and reduce the number of reports you need to create within web designer.

Fully Customizable Report Types

Create Elegant and Easy-to-Read Reports

Use our embedded Reports to generate a variety of report types - from simple mail-merge, table and vertical reports to master-detail (hierarchical) and cross-tab reports. Leverage our fully integrated report wizards and built-in report templates to create clear, concise and fully formatted documents to address the analytics requirements of your organization.

Rich Data Visualization

Comprehensive Suite of UI Elements

he goal is simple: provide business users with the information required to monitor business outcomes and make intelligent, real-time decisions. While the goal may be simple, the reality is that most reports are rigid and don't allow users to efficiently explore information on their own terms. The evolving needs of the enterprise dictate that a reporting solution offer simple and straightforward end-user customization options so that report consumers can freely manipulate output to maximize clarity. Flexibility is key and ease-of-use paramount.
