

CNU MEDICAL COMPLEX = WASTE!

CALIFORNIA NORTHSTATE UNIVERSITY WANTS TO DEMOLISH STONELAKE LANDING AND OUR LOCAL SMALL BUSINESSES TO SHOEHORN A MASSIVE MEDICAL COMPLEX, INCLUDING A 12-STORY LEVEL II TRAUMA CENTER WITH A HELISTOP, WET LABS AND MORE, INTO TO A RESIDENTIAL COMMUNITY, ADJACENT TO STONE LAKES NATIONAL WILDLIFE REFUGE.

- CNU wants to wastefully build an enormous 12-story hospital with a helistop, 400+ beds, 3000+ parking spaces, a 5-story dormitory, a 4-story ambulatory outpatient clinic and more, while other *experienced* healthcare providers are downsizing, thanks to innovative service options and realistic needs assessments,
- CNU will be wasting the dreams of local small business owners who's establishments will be demolished, as well as the dreams of neighboring residents who sought a quiet and peaceful community to call home.
- CNU will be wasting our infrastructure resources by adding unsustainable demands to our roadways, our water sources, our utilities and more.
- CNU will be wasting the beauty and safety of our environment by creating wet labs and pharmaceutical toxic waste right next to homes, schools and the wildlife refuge.
- CNU will be wasting time, money and the potential for our economy to thrive, as their funding is questionable, they're destroying current taxpaying businesses, and their project will likely end up being West Elk Grove's "Ghost Mall".

If CNU's plans go through, Elk Grove will be irreparably damaged.

**Help us stop CNU and stop the waste!
