2022 Candidates for Vancouver School Trustee

Great schools don't burden kids with transgender ideology

Platform:

Classes should be **organized rationally**, by ability as much as possible, for optimal teaching and learning conditions.

The most **successful teaching methods** (including Direct Instruction & Traditional Math) should be actively supported.

**Parents should receive clear information** about how their child is learning, and any issues the child is expressing.

**The public should have recourse** against toxic special interests, unionism, bureaucracies, academics, activists, and consultants.

There should be **no ideological proselytizing**: no transgender ideology, no climate fear-mongering, no religion or politics.

Schools should be about what children can achieve, not what they "are." **No identity or victimhood politics.**

School should leave children **literate, numerate, work-ready, and both physically and emotionally healthy.**

**COVID measures** and other intractable political disputes can be resolved by offering **choices** of class or school.

**Karin** has been advocating for effective, economical schools for 25+ years, in school board committees, in the media, and in court. Much of her writing on schooling is compiled on her blog, **Education's Gone Rogue**. <https://edrogue.blogspot.com/>

**Zelda** is a Vancouver parent who has worked 25 years in publishing. She was shocked daily at the overreach in her children's classes by school ideologies, partisan politics, Radical Gender Ideology, and unions. Every school hour devoted to indoctrination is an hour lost to the teaching of useful skills.
