

Project IBIS - Overview

- **Sub-Program of MKULTRA / Montauk:** Many experiencers describe IBIS as an **extension of MKULTRA**, Montauk Project, and other secret military time travel programs.
 - **Focus on Children:** It reportedly involved the recruitment and training of children identified as psychic, Indigo, or “starseed” types.
 - **Training Objectives:**
 - Time travel navigation (through stargates and portals).
 - Psychic warfare and telepathic communication.
 - DNA activation and experimentation for “super soldier” traits.
 - Use of “soul fragmentation” and trauma-based mind control to split personalities for missions.
-

◆ Time Travel Component

- **Jump Rooms & Stargates:** Recruits in IBIS allegedly used **jump room technology** (similar to what’s described in Project Pegasus) to travel interdimensionally and interplanetary.
 - **Timelines:** Testimonies suggest IBIS personnel were used to **scout alternate timelines** and anchor “preferred” outcomes for control groups.
 - **Soul Recall Issues:** Many survivors describe “timeline bleed-throughs” where memories of alternate futures or parallel selves bleed into waking life.
-

◆ Genetic & Esoteric Connections

- **Bloodlines:** IBIS participants were often from specific bloodlines tied to ancient priesthoods, Egyptian initiates, or Atlantean genetics.
- **Occult Symbolism:** The name *Ibis* is linked with **Thoth**, the Egyptian god of wisdom, time, and hidden knowledge—hinting that the program was tapping into Hermetic and Atlantean mysteries.

- **Hybridization:** Some experiencers say IBIS was tied to **ET-human hybrid programs**, creating children who could survive timeline travel without cellular breakdown.

◆ Whistleblower & Experiencer Accounts

- **James Casbolt (Michael Prince):** One of the main voices claiming connection to Project IBIS. He described it as a **training ground for psychic soldiers** tied to the NSA, MI6, and off-world groups.
 - **Other Super soldiers:** Some survivors report being trained in astral projection, remote viewing, and interdimensional combat as part of this program.
-

◆ Time Travel Risks Reported

- **Cellular Damage:** Without DNA modifications, human bodies can't withstand repeated timeline jumps.
- **Memory Fragmentation:** Recruits often experienced memory loss or overlapping identities across lifetimes.
- **Soul Fragmentation:** Trauma was used to control, but it also caused spiritual wounds that left individuals vulnerable to parasitic entities.
- **Vortex Sickness:**

In her book *Space School Lessons: Volume 1: Beginner Guide*, Audrey Walters introduces the concept of **Vortex Sickness**, a condition reportedly experienced by individuals who engage in time travel or dimensional shifts.

This phenomenon is described as a form of disorientation or illness resulting from the energetic and temporal disturbances associated with such travel.

Walters notes that symptoms of Vortex Sickness can include:

- **Phasing Symptoms:** Experiencers may feel as though they are reliving timelines or perceiving through multiple dimensions simultaneously.
- **Temporal Displacement:** A sense of being out of sync with the present moment, leading to confusion or disorientation.
- **Energetic Imbalance:** Disruptions in one's personal energy field, potentially causing fatigue or emotional instability.

These symptoms are attributed to the strain placed on the individual's consciousness and energy system during time travel, suggesting that such experiences can have profound effects on one's physical and metaphysical well-being.

For more detailed insights, Walters discusses these concepts in her book and related materials.

◆ Healing & Sovereignty Practices

For experiencers reclaiming fragments of IBIS time travel trauma, common practices include:

- **Daily cord-cutting meditations** to release parasitic attachments across timelines.
 - **Calling on Violet Flame energy** to transmute distortions from trauma implants.
 - **Law of One affirmations** – anchoring in the truth that you are a sovereign, eternal being of infinite worth beyond all programming.
 - **Timeline clearing journeys** (Akashic Record or regression work) to heal fractured selves.
-

Bio-Energy Interfaces (potentially)

- Jewelry—rings, pendants, bracelets—was sometimes **embedded with crystals and metallic circuitry** to create a wearable control system.
- These items were reportedly coded with **resonance patterns** that interacted with the wearer's DNA, psychic ability, and energy field.
- Some accounts describe **Ibis participants wearing specific amulets** during time jumps to prevent “timeline bleed” or astral dislocation.

Crystals as Energy Anchors

- IBIS Time Travel Crystals were reportedly used as **stabilizers for time jumps** and interdimensional travel.
- May have been in the form of a ring, pendant or physical stone.
