PORTFOLIO

Jack & Eve

2026

Jack & Eve proudly introduces a distinguished range of internal and external finishes, each chosen for its beauty, quality, and ability to transform your project into something truly remarkable.

Natural Mineral

Natural Mineral is a porcelain tile collection that replicates a unique blend of natural minerals, offering a refined stone aesthetic with carefully balanced patterns and colours. It mirrors the deep, cool tones of Ligurian slate and the warm, naturally varied hues of Brazilian slate, resulting in a surface that feels organic and authentically textured. Using advanced technology, the collection features subtle three-dimensional detailing that follows the stone's natural veining, enhancing each tile with added depth and realism. The result is a richly detailed stone effect with strong visual presence and a naturally tactile feel with a impressive ten colours to choose from.
