

Rebel Sisters Wellness can evaluate you or your animal's current physical state. Environmental stressors, such as allergens and toxins, are often causes of health and behavior imbalances. We can identify these imbalances and create individualized recommendations and homeopathic remedies to get you or your animal feeling their best.

Sample details:

- **Human samples:** Humans can be scanned in person or via saliva samples. Use a cotton swab to collect your sample and send it in a plastic bag.
- **Dogs, cats, and livestock samples:** Cut a small hair sample (quarter size) and place it in a sealable plastic bag. For dogs with really short hair that you can't cut, you can use a cotton swab and send a saliva sample in a plastic bag.
- **Horse samples:** Cut a sample from the mane close to the base of the hair shaft. We need a minimum of 20 or so strands and not larger than a pen or pencil in diameter and put in a sealable plastic bag.

Basic scans are \$100. If you would like us to evaluate your supplements, please include them in your samples package in a separate bag. Supplement evaluation scans are an additional \$50. You can include a check with your sample, or you will be sent an invoice to pay electronically, and it needs to be paid prior to the scan. We also can accept credit cards over the phone. Once the scan is complete, we will send the results and recommendations via email.

Your report will include:

- Which stressors are identified
- The level of severity for each item
- Whether it is contributing to a chronic or acute condition
- Mitigating recommendation

Wellness consultations are also available in person or on the phone.

*Scans & recommendations are NOT meant to replace proper veterinary or medical care. Always consult your chosen veterinary or medical professional before starting you or your animals on any therapy.*
