# AcriTech™ 650

**DESCRIPTION:**

**AcriTech 650** is a chemical and water resistant, polymer modified acrylic elastomeric coating. Applied as a single component liquid which cures to a durable, flexible coating. Applications include; roofing, corrosion protection, storage and process tanks, piping, metal and wood structures, decks and walkways. Check with your **Star Polymers** representative for primer recommendations.

## Features and Benefits

- A high quality, VOC free, solvent free, single component, water-based emulsion. Modified with various polymer additives.
- Designed to provide a long-lasting flexible membrane that will retain this flexibility even in the harshest climatic conditions.
- Formulated using specialized pigments and biocides to provide maximum UV resistance and minimize discoloration from dirt accumulation.
- Has excellent adhesion to most surfaces.
- Chemical Resistance to most organic and inorganic solutions, including petroleum hydrocarbon products.
- High Solids and Excellent Hide allow for 1 coat coverage in many applications.
- Production geared toward large orders and rapid order fullfillment.
- Color Pallet Available:
