Monthly Beauty Tips with Taryn Rockne Rogers

SELFIE SCHOOL

The Best place to take a selfie, is while standing in the light of a window. Nothing beats the glow of natural light on your skin.

Don't look at yourself, look into the camera. When you look at your own reflection, your photo will look like you've gone cross eyed and you won't connect well with the person looking at your photo.

The rule of thirds. This tip gives your photo more depth and interest. Keep your subject (in this case, yourself) in the top cross section of where the lines meet on the grid (pictured). Don't allow too much awkward space to float above your head.

SUMMER MAKEUP

The simplest makeup looks best in the summer. Here are the staples you should stick with

- *Bronzer*
- *Liquid Shadow*
- *Lipgloss*
- *Mascara*

BEAUTY ONLINE

Let's call it what it is, FAKE. Filters on photos and videos make everyone and everything LOOK perfect, but it's not. Makeup looks like makeup, our skin does have natural texture Don't allow a photo online make you feel like you aren't perfect enough, because their filters, aren't real.
