

HIT-6™ Headache Impact Test

HIT is a tool used to measure the impact headaches have on your ability to function on the job, at school, at home and in social situations. Your score shows you the effect that headaches have on normal daily life and your ability to function. HIT was developed by an international team of headache experts from neurology and primary care medicine in collaboration with the psychometricians who developed the SF-36 $^{\circledR}$ health assessment tool. This questionnaire was designed to help you describe and communicate the way you feel and what you cannot do because of headaches.

To complete,	please circle one	e answer for each o	question.	
When you have	headaches, how of	ten is the pain severe	?	
never	rarely	sometimes	very often	always
How often do h	eadaches limit you	r ability to do usual d	laily activities inclu	ding household
	nool, or social activ	•	·	
never	rarely	sometimes	very often	always
When you have	a headache, how o	ften do you wish you	could lie down?	
never	rarely	sometimes	very often	always
In the past 4 we	eks, how often hav	e you felt too tired to	o do work or daily	activities because
of your headach	ies?			
never	rarely	sometimes	very often	always
In the past 4 we	eks, how often hav	e you felt fed up or i	rritated because of	your headaches?
never	rarely	sometimes	very often	always
In the past 4 we	eks, how often did	headaches limit your	r ability to concent	rate on work or
daily activities?				
never	rarely	sometimes	very often	always
+ COLUMN I 6 points each	COLUMN 2 8 points each	+ COLUMN 3 10 points each	COLUMN 4	COLUMN 5 13 points each
To score, add points	for answers in each col	umn.
