

CoViD-19 Testing

Wilde Desert Family Medicine
2585 E. Wilcox Dr.
520-255-5475

It is our preference that you obtain a CoViD-19 test from your primary care provider. If your primary care provider does not offer this testing we make this available to the community.

Please print the second page of this document. If you want to use your insurance to pay for the test then please bring a photocopy of your insurance card.

On days that we are open we run tests at 8AM, 9AM, 10AM, 11AM, 1:15PM and 2:15PM. On Fridays we only run tests till 11AM. Dr. Wilde will meet you in the parking lot. Please do not come into the office. Please realize that these times are approximate as Dr. Wilde comes out in between seeing patients. You will have a wait. Once you arrive in the parking lot call the number above to let us know you are out there. We will ask you for a description of your car.

Tests Available

Tests kits are extremely difficult to obtain and it is likely that not all options will be available.

Rapid Tests

These tests are about 80% sensitive. This means they will test positive in 80% of those with covid and miss 20% of those with covid. They are quick and relatively inexpensive.

In house PCR tests

This is a very accurate test. The Abbot ID tests only for CoViD-19. The Cephiad tests for CoViD-19, Influenza, and RSV. The BioFire tests for 15 different viruses including CoViD-19 and 4 different bacteria that can infect the lungs. **Our machines can only run 1 or 2 tests at once and so these tests require an appointment.**

Send out Tests

We can always collect a swab and send it out to a reference lab. We have several labs that we work with. If one lab gets behind then we will recommend a different lab.

Do Not Come into the Office!

Call us when you get here.

Do Not Go to the Wrong Office—see address above!

CoViD-19 Drive Up Test Request Form

Date: _____

Name: _____

Birth Date: _____

Address: _____

Phone: _____

	BioFire(15 Virus/4 Bacteria)	3 hours	98% sensitivity	\$238	87633 + E&M
	SonoraQuest	2-14 days	99% sensitivity	\$18 plus lab	E&M

Office Use

cc: Covid 19 test

- S: History as above
- O: NAD Alert NO cough No respiratory distress
- A: COVID-19 exposure Z20.822
- Possible Covid-19 exposure Z20.822
- Cough R05
- Pre-op Z20.822
- Fever R50.9
- Fatigue R53
- Personal History of Covid-19 Z86.16
- _____
- P: COVID-19 test as above.
- Reviewed possibility of false negative tests
- Discussed need for isolation
- Discussed need to contact household members
- Discussed health department may contact them
- Discussed follow up with their primary care physician
- Discussed signs and symptoms of CoViD-19 and disease course
- Discussed that a negative test does not guarantee not contagious in the future
- Retest in ____ days. May be too early.
