I certify that I am the registered owner/long term lessee of the vehicle referenced above. I am requesting that Veoneer US, Inc. (formerly known as Autoliv ASP, Inc.) ("Veoneer") readout certain electronic information that may be stored in the restraint control module of the above-referenced vehicle.

Provide a Courier name and shipment tracking number for the module, so we know when to anticipate delivery and can advise you if the delivery is not received. Ship to Veoneer US, Inc., ATTN: RCM Downloads; 26360 American Drive, Southfield, Michigan 48034 USA.

I understand that a restraint control module may be capable of recording data that may include information regarding the use of the restraint systems, including but not limited to: use of seatbelts by the driver and passengers, and/or information about the performance of the restraint system (e.g., restraint deployment times, airbag warning light status, etc.) (data recorded varies by vehicle manufacturer and model). This data could potentially include information regarding how the driver operated the vehicle. I understand that this information may be stored by the module during regular operation or in a crash or near-crash event.

I understand that due to technical problems, physical damage (sustained while installed in the vehicle or in shipping/handling) or other reasons, some or all of the data may not be recorded or retrievable. I also understand that there is a possibility that the restraint control module may be damaged in the process of fulfilling this request. I assume this risk. I acknowledge that Veoneer has no responsibility for loss or damage during shipping and handling of the restraint control module, or for the loss or inability to retrieve data from the restraint control module. I release and agree to hold harmless Veoneer from any and all liability arising in or out of the readout services I have requested to be performed on the restraint control module.

I understand that Veoneer offers no explicit or implied warranties on the services to be performed. THEREFORE, ALL SERVICES PERFORMED BY VEONEER TO FULFILL THIS REQUEST ARE PROVIDED AS-IS WITHOUT ANY WARRANTIES. I acknowledge that I am responsible to pay the applicable charges for the readout services regardless of whether or not crash information is retrievable or recorded by the module. The charge for the data download and report is **\$2,000 USD** (Two Thousand Dollars), payable via check to Veoneer US, Inc. to be enclosed with the module when shipped.

I understand that in addition to myself and Veoneer having access to the information, Veoneer may provide access to the module or the information contained in the module to suppliers, automakers, or agents/service providers in connection with the readout and analysis of the data. I understand that Veoneer may also be required to provide the information to others who demonstrate sufficient legal authority to receive it.

I acknowledge that I have read and understand the terms set forth above and agree to them, and that I enter this agreement freely with full authority and right to do so.
