Booklet Printing

Booklet Printing - Digital Printing & Assembly Options

We print and assemble booklets in our shop - something we exclusively offer in the local area! We have several printing & binding options.

Papers

You can choose from many types of papers, from plain 24lb paper to heavy, glossy papers and card stocks.

Printing

We can print single pages or spreads, depending on the type of booklet you want. Our exclusive imposition software enables us to program the printer to lay out booklets digitally before printing, so we can set up the pages to print exactly what you need!

Binding

We offer several binding options, including comb binding, coil binding and saddle stitch. Or you can have a good old-fashioned staple in the corner! All of our binding options include discounted page pricing so your booklets are not only beautiful, but affordable, too!

Comb and Coil Binding

Comb and coil binding are similar. Comb binding uses rectangular punched holes on the margin of the paper, while coil binding uses oval hole punching. Both work really well, but for booklets that will be used a lot, coil binding is more durable.

Coil and comb binding are great for booklets with large numbers of pages, but smaller page counts will work, too. We can bind up to 300 sheets, depending on the papers used. We also include a clear cover and black vinyl back to protect the pages inside.

We use high-quality hole punching equipment to create quality booklets FAST!

Saddle Stitched Booklets

Saddle stitched booklets are printed in spreads (two pages per side), then folded and stapled on the fold in two places. Saddle stitch is good for booklets with 64 pages or fewer, depending on the papers used.

Raised Foil Cards printed on 16pt stock with Suede cardstock

Add a flash of brilliance to suede cards that you can see and feel. The combination of raised foil contrasted with the velvety smooth suede foundation creates a tactile experience that customers can see and feel. Metallic embossment effects can enhance amazing detail in images, special accents, and logos. The Suede Cards are printed on 16pt card stock, laminated on both sides with 1.5mil scuff resistant, soft velvet laminate, which give them a substantial thickness of 19pt

Rounded corners available for an additional 20%.

One or both sides can be foil.

Canopy Tent & Accessories

Full Color Event Tent

10 foot Event Tent is the next level in outdoor advertising. Achieve 360 degrees of branding with a custom full fabric dye sub canopy and hardware package.

Canopy is made of Weather Resistant Tent Polyester. Print your brand message on each of the four peaks and valance panels.

Heavy duty hex shape aluminum hardware gives the tent strength in outdoor installations.

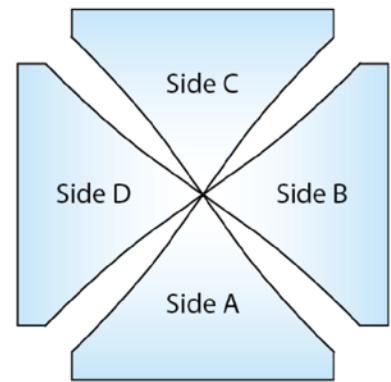

Telescopic legs allow you to adjust the height, and the interior lattice expands the tent interior with the crank of a handle.

Each leg has a foot plate ready to be staked to the ground. (Ropes, stakes, and standard carrying bag included with hardware).

Size and Weight:

Polyester Banners

Ideal for trade show graphics, soft signage, and interior decoration these 100% polyester banners are wrinkle-resistant and printed using a superior quality dye sublimation* process.

- Comes Standard with 4-sided stitching & grommets every 2 feet.
- Choice of black or white thread.
- Optional pole pockets (2" or 4") at no extra charge. Pole pockets can be left-right or top-bottom.
- Grommets and pole pockets cannot be combined.
- Artwork must include 0.5" of bleed on each side.

Dye-sublimation printing is a digital printing technology using full color artwork that works with polyester and polymer-coated substrates. Also referred to as digital sublimation, the process is commonly used for decorating apparel, signs and banners, as well as novelty items such as cell phone covers, plaques, coffee mugs, and other items with sublimation-friendly surfaces. The process uses the science of sublimation, in which heat and pressure are applied to a solid, turning it into a gas through without passing through the liquid phase.

The end result of the sublimation process is a nearly permanent, high resolution, full color print. Because the dyes are infused into the substrate at the molecular level, rather than applied at a topical level (such as with screen printing and direct to garment printing), the prints will not crack, fade or peel from the substrate under normal conditions

What is Variable Data?

Variable data is used to print address information on each envelope when mailing to a list of people.

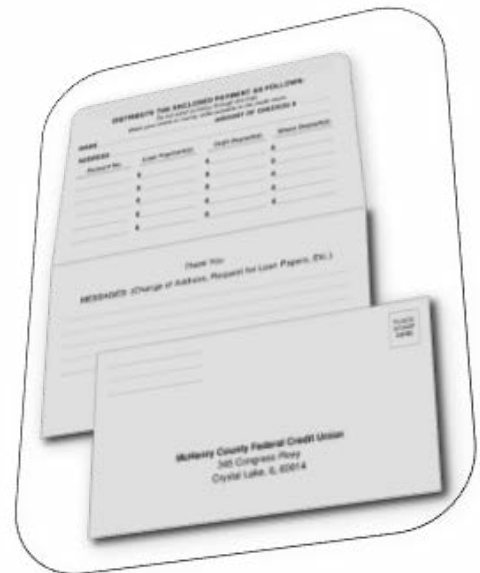

Variable data is typically set up in an Excel or CSV file, and is formatted to include all of the information necessary to mail the piece - name, address and business name if necessary.

Variable data is handy when mailing to large groups to minimize the effort to add mailing addresses, and is often used along with Bulk Mail to reach clients, prospects, or newsletter recipients.

What is the difference between "pre-inked" and "self-inking" stamps?

PRE-INKED

- Best quality image
- Lasts for 50,000 impressions
- Refillable
- Oil-based ink
- Lifetime guaranteed
- Recommended for stamps with logos

SELF-INKING

- Good quality image
- Lasts for 10,000 impressions
- Refillable
- Water-based ink
- Economical price
