

TOWN OF LOWNDESBORO

PLEASE LIMIT WATER USAGE

WATER SYSTEM UPDATE | AUGUST 2026

As of August 14, 2026, the Town of Lowndesboro's well is out of service. Lowndesboro is currently receiving water through its interconnect with the Pintlala Water System.

Pintlala is also operating below full capacity because one of its wells is out of service. Our well service contractor is coordinating work on both systems. Once Pintlala's well is returned to service, the contractor will begin servicing Lowndesboro's well.

THIS IS NOT AN EXTREME EMERGENCY

Normal household and business water use may continue.

PLEASE CONSERVE WHERE POSSIBLE

Because Pintlala's capacity is reduced and temperatures are extremely high, please postpone or limit nonessential water use, including:

- Watering lawns
- Washing vehicles
- Other high-volume water use that can reasonably wait

Your cooperation will help preserve an adequate water supply while both systems are operating at reduced capacity.

Thank you for your patience and cooperation.

Please call (334)223-9618 with any questions.
