

Site Manager, Voltex

The Site Manager, Voltex reports directly to the President and CEO. ***The position requires daily, on-site presence in Colorado Springs, Colorado*** (this is not a remote-working position).

- Provide leadership for a power supply manufacturing operation, including oversight of Engineering, Production, Quality Control and Regulatory Compliance.
- Provide leadership and hands-on participation in an Engineering Design and Development capacity.
- Lead in the design and implementation of a Quality Management System towards ISO Certification.
- Participate in the creation and execution of annual strategic, business, and operational plans.
- Understand capacity constraints, devise and execute operational plans to significantly grow production volumes.
- Establish and monitor Key Performance Indicators for the site.

Bachelor's degree in electrical engineering and 5+ years of experience required, with at least some supervisory experience. This is an excellent opportunity for an Engineer who is looking to transition into a leadership role.

This position offers a competitive salary, bonus opportunity and benefits.
